TurboTar.app.0.92b
Stefan Preuss

TurboTar (TT) is a backup tool for SCSI Tapedrives. It handles 'offline' Indexfiles of your Tapes and accesses stored data quickly. TT uses 'gnutar' to perform backup and restore operations.

 DATer
 Version 1.1 by Alexander Hinds
 This application will make DAT tape labels
   Includes source code

Motorola/Intel/PA-RISC/SPARC

JumpBack
by joe
This program will backup a directory into another directory, usually onto an OD or SCSI hard drive.
  Includes source code
  Motorola/Intel/PA-RISC/SPARC

    Opener3.3
    Version 3.3 April 1995 by Micheal Hawley
    and Denise Howard
    The BEST, uncompresses just about everything.
  Motorola/Intel/PA-RISC/SPARC

  PackageInspector-0.96
    By Tom Hageman version 0.96   March 1996
    Simple inspector for Installer package (*.pkg*) files.   It displays, in
    Workspace's Contents Inspector, essentially the same information

about the package as Installer's Info view.
Includes source code

TARInspector1.0
by Glenn Brown

TARInspector allows the user to view a listing of the contents of .tar files from within the the NeXTSTEP Workspace Manager.   This is especially useful in determining whether unarchiving the .tar file will neatly place all unarchived files within a folder or messily unarchive many files within the current directory.

tarZanV1.0
Version 1.0 by James T. Romano & Salvatore Saieva

tarZan gives you access to the Unix compress and tar programs without having to invoke a shell!
Includes source code

Motorola/Intel/PA-RISC/SPARC

Unarj
Jason Fosback
The ARJ compression method is becoming increasingly popular on MS-DOS based machines, so here is a port of the decompression program.
   Includes source code
  Motorola/Intel/PA-RISC/SPARC

Uncompress
Ron Fellman
Uncompress is a simple graphical user interface wrapped around the Unix command "uncompress" and "compress".
   Includes source code
  Motorola/Intel/PA-RISC/SPARC

UnTar
alex@cosmos.ACS.CalPoly.EDU

The following two utilities untar and uncompress files from the browser. To run, you simple double click either a .tar or .Z file and things take off.
