

LogInput;¬Message Log / Input

converse-log.tiff ¬

The "**log/input**" window displays all incoming messages and the outgoing message. This window can be brought up from the Tools menu or with command-L.

The top half of the window displays the incoming messages and logs any messages you send.

The lower half of the window is where you type messages to send.

The Send button will send the message from the "input" portion of the "log/input" window to the user machines selected in the "User Addresses" Browser.
