Modules are now dynamically loaded.

Various Preferences

Mail Files... Service menu entry.

FileShelfView now shows file names a la Workspace

Bug fixes

Note Worthy:

Directory/FileCollection

A directory management class - loads all files in a directory and provides Borne type file matching to select subsets.

ModuleMgr

A class to manage dynamically loaded modules.
Enforces category adherence. Searches path i.e.
LocalLibrary:Library.

Version 0.05:

3/25/94

Supports outgoing enclosures only.

Supports: ASCII, NeXTMail, Script, MIME,
MSMail.

Minimal Help.

No Preferences.

Note Worthy:

Info.subproj

A nice, clean and useful info panel subproject. Has
version number and mail to maintainer support.

StringStorage/Filename

Clean simple string class and filename category.

FileViewShelf

Simple but nice implementation of a drag and drop file
shelf.
