

Notes

Poste is free! Use and abuse it to your hearts content.

This application has been tested on a non-networked Cube running OS v2.0, a NeXT laser printer, and standard US envelope sizes.

BUGS

(**1) There is a known bug with Release 2.0 that /LocalApps is not in the default application path for new users. This was fixed for 2.1 so new users created from 2.1 won't have this problem.

For pre-2.1 users to get the right default path, use `dwrite(1)` in a Terminal window to edit the default application path:

```
localhost> dwrite Workspace ApplicationPaths  
    "~/Apps:/LocalApps:/NextApps:/NextDeveloper/Apps:/NextA  
    dmin:/NextDeveloper/Demos"
```

The user must log out and log in again for the change to take effect.

[NextAnswers QA729]

Planned Improvements

Autosizing text fields. Improved feedback for border hinting.

Comments

I'm always interested in hearing comments and suggestions...
