

# Warranty and copyright

438886\_paste.tiff ↵

## COPYLEFT

Source code that is not part of the MiscKit project - and therefore underlies the MiscKit distribution and copyright rules - is distributed under the GNUpublic license.

You are free to extend and modify this application. But don't redistribute a modified version under the same name unless I gave you the permission.

I don't want to have different, confusingly incompatible versions running around the world.

Anyway...comments are **highly** appreciated.

## NO WARRANTY

This software is provided "*as is*" and the programmer is not responsible for any harm this program may cause.

You - the user - are responsible for everything that may happen to

your business, hardware, software, car, CD collection or what ever may be worth your attention or money.

Using this product is on your own risk and your private fun.

There should be no serious bugs here but remember that a carbon-based unit did the coding.

## **TRAVEL WARE**

Like all my projects this app is free and should be considered as travel-ware.

166998\_12ptHevBlk.tiff ↵      Let it travel to as many people as you know.

02\_12ptHevBlk.tiff ↵ Send me a postcard or e-mail if you use it. I will try to keep you informed about new releases.

03\_12ptHevBlk.tiff ↵ If you have a free bed or some free space on your floor<sup>1</sup>/<sub>4</sub> give me a hint. I might come and visit you on my trip to the US (locations on Hawaii, near Seattle or WhistlerMnt. (Canada) preferred)
