

The Find panel

Line.tiff ↵

Provides forward and backward search of defaults and/or values. The search area can be set through the following buttons:

paste.eps ↵PixelDotted1.tiff ↵

find;↵Find:

Enter the search text here. The "Enter Selection" command copies the current selection into this text field.

ignoreCase;↵Ignore Case

Before comparison internally converts upper case in lower case letters.

findNext;↵Find Next

Searches for the next occurrence of the search text.
Identical to the "Find Next" command.

findPrevious;↵Find Previous

Searches for the preceding occurrence of the search text.
Identical to the "Find Previous" command.

searchAll;↵Search All

Searches through the whole defaults database and collects all found entries in the Search All panel.

PixelRule1.tiff ↵

- While pressing <Alternate> **Search All** is restricted to the

currently selected owners in the main browser.

- If you end the search text with a <Return> the panel will be closed if the text could be found.
- If the search string is empty, **Search All** will "find" the whole database.
