

Test command

Line.tiff ↗

625881_TitleInside.tiff ↗ TestInside.tiff ↗

Determines all obsolete defaults database entries. Searches through all owner search paths to find a corresponding application with valid type for each owner in the database.

Shows all detached owners in the Test panel afterwards ± except those registered as daemon owners.

434713_PixelRule1.tiff ↗

- You can configure owner search paths and owner types using the Preferences panel.
- The only way adding an owner into the daemon owner list is using the test panel; the only way to remove it is using the "Daemon Owner" preference.
