

# The main browser

Line.tiff ↗

The main browser is the first thing you see after selecting the *DefaultsSystem* module. The left column shows a list of all stored owners of your defaults database, the right all defaults of a selected owner.

paste.eps ↗

There can be none, one or any number of items selected. A zero selection is equivalent to a total selection. This is a special property applying only to the main browser, other browsers behave as wanted. Both pull down menus refer to the current selection in the column below them.

PixelRule1.tiff ↗

- Double-clicking in the main browser has the same effect as clicking the toggle button
- The contents of the main browser are updated every time you reselect the *DefaultsSystem* module.
- All panels belonging to the *DefaultsSystem* module are hidden if another module is selected and redisplayed if the *DefaultsSystem* module is selected again.
- All *DefaultsSystem*-specific keyboard alternatives are available only as long as the *DefaultsSystem* module is selected.
