

Backup command

Line.tiff ↵

TitleInside.tiff ↵ menupath2.tiff ↵menupath3.tiff ↵

Saves the whole database in a file with automatically generated file name.

800043_PixelRule1.tiff ↵

- The target directory can be set through the "Open and Save Options" preference.
- The file name has the following format:

YYMMDD*vers*.defaults

Thereby means **YYY** the number of years since 1900, **MM** the month (starting with 1) and **DD** for the day. *vers* is a sequence of letters and only present if an equally named file already exists in the target directory.

PixelRule1.tiff ↵
