

# Open command

Line.tiff ↵

TitleInside.tiff ↵    menupath2.tiff ↵OpenInside.tiff ↵

Opens the standard Open panel, loads the selected file and inserts its contents into the defaults database.

634729\_PixelRule1.tiff ↵

- The file formats **.defaults** and **.dset** can be loaded.
- The open filter provided by the open panel is usable only for **.defaults** files.
- You can also open a defaults file through drag & drop onto the module window.
- You can open only one file at a time.

PixelRule1.tiff ↵
