

Add command

Line.tiff ↵

TitleInside.tiff ↵ AddInside.tiff ↵

Asks for the name of the new owner. Since each owner must have at least one default its name is asked subsequently.

84101_PixelRule1.tiff ↵

- The command fails if an equally named owner is already in the database.
- Adding an owner is useful only for apps which don't have their own preferences panel (e.g. **loginwindow.app**).
