266379_PixelRule.tiff ↵

639016_TaskArrowSm.tiff ↵ This has been tested on NeXT hardware, using the CD-ROM drive from NeXT and the Apple CD300. It has been tested on a DECpc XL60 (ie, NS/Intel), using an internal CD-ROM drive that comes from DEC (made by Toshiba). It may not work well (or at all) with other CD-ROM drives. There may still be some problems when used on NS/Intel machines. Be careful when first trying this on your NS/Intel system with your CD-ROM.

This has not been tested at all on NS/PA-RISC machines.
This has not been tested at all on NS/SPARC machines.

187488_PixelRule.tiff ↵

945_TaskArrowSm.tiff ↵ The current version of mCD is mainly just a fun programming project which I (Garance Drosehn) have been working on.

If this program works for you, great. If it does not work, I'm not going to be responsible for any headaches it causes. If these terms aren't agreeable to you, then don't run this application.

I would be interested in any ideas that people want to send me, but I can't guarantee that I will have time to do much work on this program.
