

Find Previous command

Line.tiff ↵

TitleInside.tiff ↵ menupath2.tiff ↵menupath3.tiff ↵

Searches the previous occurrence of the search text from the beginning of the current selection; the place where it's found is selected and scrolled into sight if necessary.

144642_PixelRule1.tiff ↵

- If the beginning of the search area is reached the search is continues from the end.
- The error beep sounds if the search text can't be found or if it's currently selected and can't be found once more.
- This command copies the current search text onto the find pasteboard.

PixelRule1.tiff ↵
