

"General Settings" preference

Line.tiff ↗

Summary of other preferences.

PixelDotted1.tiff ↗

moduleHeight; ↗Module Height

ShortLine.tiff ↗

The height of the *DefaultsSystem* module on startup. You must restart **Preferences.app** to see the effect,

PixelRule1.tiff ↗

- Minimum value:180
Maximum value: screen resolution depended
- This setting just affects the *DefaultsSystem* module, the heights of other modules are unchanged (i.e. the window adjusts itself depending on the currently selected module).

361197_PixelRule1.tiff ↗

showValueView; ↗Show Value View on Startup

MiddleLine.tiff ↗

Settles whether the value view is visible on startup or not.

662743_PixelRule1.tiff ↗

useRightMouse;↗Use Right Mouse Button

203784_ShortLine.tiff ↗

If this switch is checked the right mouse button works as `<Shift>` click in all browsers that allow multiple selection.

226830_PixelRule1.tiff ↗

- This option is available only if the "Menu Button" preference of the *Mouse Preferences* module is activated.

19470_PixelRule1.tiff ↗
