Welcome to Fiend v1.4.1!

*What does it do? Well, Fiend is a dock extender, first and foremost. It is the **only** quad-fat dock extender capable of animating **all** of your animated icons, as well as supporting multiple, named dock levels, handling command-dragging, command-double-clicking and arbitrary configuration and placement of your dock and the docked icons in an integrated*

and seamless fashion.

Fiend is also a shelf extender that turns your entire desktop into a shelf that can display an image of your choice.

Finally, Fiend is capable of loading your BackSpace modules, so it can function as a screen saver as well.

Fiend started out in April of 1994 as "a couple of minor enhancements" to MonsterShelf.app, written by Brian

Pinkerton (of WebCrawler fame, whose address is [bp@cs.washington.edu]).

Many months of continuing "minor enhancements" later (as well as relentless feature requests and demands from my friends Alex Cone [abc@object.com] and Ed Wright [address withheld], in addition to the users of Fiend v1.0, who practically speaking, made the app what it is today) resulted in (among other things):

- A multi-level, resizable dock*

Pasteboard support

Multiple file dropping

Image background with tiling

Backspace support

Autolaunching

Services

Full icon animation

Named dock levels

Level-independent icons

Level-following app activation

*Full icon animation and app launch
status tracking*

You can find Instructions, Release Notes, and Frequently Asked Questions (FAQs) on the "Info" menu.

ACKNOWLEDGEMENTS:

I would like to thank Brian Pinkerton for placing his code in the public domain, thus providing the inspiration (and some of the underlying structure) for Fiend.

Huge thanks to Ed Wright and Alex Cone for their unrelenting feature demands. Thanks too, to the users of Fiend v1.0

who coped with its limitations long enough to give me some cool suggestions.

Many thanks also to the many beta testers of Fiend 1.4, including:

Hadar Pedhazur

Alex Cone

Ed Wright

Leif Smith

Dino Bagdadi

Bruce Lambert

Stephen Perkins

SHAREWARE NOTICE:

*Fiend v1.4.1 is **shareware**. This means that unmodified, original copies may be given away freely (and widely). It does **not** mean that Fiend v1.4.1 is in the public domain. I (David Lambert) hold the copyright, and reserve all rights thereunder.*

*Accordingly, you may **not**:*

- modify Fiend v1.4.1 in any way which

removes or alters the copyright notices, nor distribute copies that have been modified in any way;

- sell it (or otherwise distribute it for profit);*
- include Fiend v1.4.1 as part of a for-profit distribution, unless you give prominent notice that it is readily available free.*

UN-WARRANTY:

This software is provided "as-is", without warranty of any kind, not even a warranty of merchantability or fitness for a particular purpose. In no event shall I (David Lambert) be held liable for any damages, including lost profits, lost data, or any special, incidental or consequential damages arising from the use of Fiend v1.4.1, even if I have been advised of the possibility of such damages.

FINAL NOTES:

*I hope that you find this app useful and/or entertaining. If you really like Fiend, or if you want to inspire new features or enhancements, you may feel free to send me \$10 (and maybe you should - it's not a lot, I think, considering the amount of work that's gone in to it - also, if people do this now, I'll be less inclined to actually **sell** it on future releases....).*

Peace.
