Sizingwindowsandpanels;¬Sizing windows and panels

arrow.eps ¬   Drag the resize bar in the direction you want the window to grow.

Or

1   Select the window by clicking its titlebar.

2   Choose Tools arrow.eps ¬ Inspector to bring up the inspector window.

3   Enter the dimensions in the Size display of the Inspector panel.

After you drag a window or panel from the Windows palette and drop it on the screen, you'll probably want to resize the object to a suitable dimension. To resize a window, drag the resize bar in the required direction.

_SizingWindows.eps ¬

To resize windows or panels with greater precision, enter the exact dimensions in the Size display of the Inspector panel.

_SizingWindowsPanels.eps ¬

You can also use the Inspector panel to size interface objects with numerical exactness. See ªPositioning and sizing preciselyº for more information.   ;PositioningAndSizingPrecisely.rtfd;;¬

Also see ªThe Coordinate System in Interface Builderº for some conceptual background.
