Open a NetInfo domain

4padPointRule2.eps ¬

You can use the NetInfoManager application in **/NextAdmin** to find and open a NetInfo domain in its own window.

768008_PointRule2.eps ¬

1   Log in as root on any computer on the network.
   If you don't log in as **root**, you can type the **root** password if the User Authentication panel appears.

854809_PointDashedRule3Black.eps ¬
2   Double-click NetInfoManager in /NextAdmin.
276552_PointDashedRule3Black.eps ¬

711037_TaskArrowSm.tiff ¬   **To select a domain from a browser, choose Domain** *23664_submenu-arrow8.tiff* **¬ Open from the NetInfoManager menu, select the domain you want from the browser, and click OK ;../Reference/Tools/NetInfoManager/NetInfoManagerPanels/SelectNIDomainPanel.rtfd;;¬.**

427113_PointDashedRule3Black.eps ¬

114042_TaskArrowSm.tiff ¬   **To open the parent of the domain in the key window, choose Domain** *submenu-arrow8.tiff* **¬ Open Parent from the NetInfoManager menu.**

983589_PointDashedRule3Black.eps ¬

653977_TaskArrowSm.tiff ¬   **To open a domain outside the domain you're logged into, choose Domain** *29515_submenu-arrow8.tiff* **¬ Open By Tag from the NetInfoManager menu. Type the host name (or Internet address of the computer where the domain information resides) and its domain database tag. Then click OK.**

401891_PointDashedRule3Black.eps ¬

The title bar of the domain window shows the name of the domain database tag and the name of the computer as well as the full pathname of the domain.
