Chapter 1

Compendium Deluxe #1 Sample Tools Menu

1.1 Sample Tools

| Filename | Comands | Size | Description |
|---------------|---------|------|--|
| adios201.lha | VX | 12K | AudioScope 2.01 - This computes and displays a real-time frequency spectrum analysis of audio signals. It requires a 68020 as a minimum and an 8 bit audio digitizer (PerfectSound3, Sound Magic, Sound Master, DSS 8, etc.). A 512 point Fast Fourier Transform (FFT) is used to analyze the frequency content of the input audio signal. |
| agmspla8.lha | VX | 25K | AGMSPlaySound V8 by Alexander G.M.Smith - This is a Modula-2 program which plays arbitrarily large IFF and raw sound samples from disk. Since AGMSPlaySound doesn't load the whole sample into memory, you can play samples longer than your memory size (up to 2 gigabytes). It also leaves lots of memory free for other uses. |
| agmsrec5.lha | VX | 41K | AGMSRecordSound V5 by Alexander G.M.Smith - AGMSRecordSound is a Modula-2 program which records sound samples to disk, using a standard parallel port audio digitizer. AGMSRecordSoundPS3 is a modified version that works with version 3.0+ PerfectSound hardware. |
| DSound150.lha | VX | 38K | DSound 1.50 by Dave Schreiber - A utility written to play 8SVX sound samples directly off a hard drive. While it only takes up a small amount of chip RAM, it can play samples of unlimited size off a hard drive (it doesn't work to well with floppies however). Currently, it cannot play compressed sound files. |
| fmsnth32.lha | VX | 130K | FMsynth v3.2 by Christian Stiens - This is a program for generating sounds by FM Synthesis. The sounds can be played on your Amiga keyboard and saved in IFF-8SVX or raw format. |

| | | |
|--------------|----|---|
| lsd-sply.lha | VX | 8K Sample Player V1.0 by Oedipus/LSD - I wrote this to help musicians who have to look through hundreds of tedious samples just to find the one they want. Samplay will play any IFF sample and then return you to a file requester to play another - a lot easier than loading them into Protracker! |
| sound211.lha | VX | 159K Sound Effect 2.11, a sample editor and Effects generator. |
