1.1 Picture Viewer Archives

Filename	Comands	Size	Description
aivel.7.LHA	VX	32K	AIVE 1.7 by Laurent Vivier - Displays 256 colors pictures on a basic Amiga.
bview102.lha	VX	87K	Bview 1.02 by Joeri Alberty - Bview is another IFF/ILBM viewer for ECS and AGA but with a gadget interface. You can change the bitmap width and height to fit or aspect your picture in an other resolution. HAM etc. will not give such high quality outputs.
fasjpg.lha	VX	32K	FastJPEG 1.0 by Christoph Feck - This is a fast JPEG picture viewer. Let me claim that it is the fastest JPEG viewer freely available for the Amiga. Besides being fast, it has many other advantages.
ham8_jpe.lha	VX	143K	Ham8 al-j al-backdrop 1.1 by Michael Saunby These are two JPEG viewers for AGA Amigas (A1200, A4000). Al-j gives a scrollable window display of a JPEG file. Al-backdrop resizes the screen and loads a JPEG file as a backdrop. The palette is fixed so a backdrop plus several windows is possible. Note: Large images eat up lots of chip r
megavi20.lha	VX	136K	MegaView 2.0 Frontend by Digital Dimensions Yhis is a frontend to all kinds of viewer programs. It uses whatis.library to determine the file's type, then uses a file in s: to perform an action on this file depending on its type (the action usually is to simply show the file).
mp102.lha	VX	52K	MP 1.02 (Mpeg player) for ECS/AGA/OpalVision /PicassoII by Michael van Elst - This is a MPEG software

decoder. It is derived from the UNIX/X11
MPEG decoder version 2.0. Needs 020+, 2MB,
KS2.

tshow1_3.lha VX 11K TigaShow 1.2 by Thomas Herlyn - This
displays images stored in the common GIF

tv112.lha VX 106K TIFFView 1.12 by B. Wynants - This will
read, view and print TIFF, MacPaint, GIF
and IFF pictures and convert any to IFF
format. TIFF Files (Tag Image File Format)
are commonly used in the graphic computer
world (Mac, Sun, NeXT, IBM). KS2 needed.

vt_2.lha VX 263K View Tek 2.0, shows AGA, Gif etc. KS2+,
well worth using!
