Compendium Deluxe #1 Icon Collections Menu

1.1 Icon Collections

Filename	Comands	Size	Description
clumpico.lha	VX	78K	Clumpi collection - A collection of useful icons for you to use, nothing more
hdocks.lha	VX	42K	8-color brushes for use with toolmanager (prefs and programs) - This contains some 8- colour brushes for use with Toolmanager especially in connection with MagicWB. Included are 20 prefs brushes for the standard workbench-preferences and 10 for other programs. They are designed in MagicWB style.
heinzpat.lha	VX	278K	Heinz Patterns for Workbench by Michael Heinz - I created these IFF patterns to use as backdrops on my Amiga. I run a 1024x768x 16 colour workbench using a Retina video card, so the patterns are fairly large. They should, however, look fine on a normal WB of 640x480 resolution or higher. They are larger than standard WB patterns.
hofidl166.lha	VX	128K	hofiDI166 - These files are animated DocIcons for the ToolManager (ONLY TOGGLEIMAGES!). You need a 8 colour Workbench. All icons are drawn in the colourmap of MagicWB. If you want to draw your own icons you can find an empty BackdropIcon in this archive called: "EMPTY-BACKGOUND.anmb".
icon_leo.lha	VX	47K	Icon_leo - This is a collection of icons for you to use with your Workbench, author unknown.
MagicWB20d.lha	VX	263K	MagicWB 2.0 by Martin Huttenloher - A full replacement for the graphic user interface of the Workbench and has become the standard on the Amiga. MagicWB 2.0 is completely restructured on a new color-allocation scheme which more than doubles the speed of the WB and reduces

chip-consumption.		
mwb8cls.lha	VX	92K MagicWB icons by Martin Huttenloher - This package contains ALL STANDARD SYSTEM-ICONS and more (actually 60 different Icons) painted in a new completely different style: They look VERY 3-DIMENSIONAL, are 8 COLOURS, have GRADIENT fills, feature CLICK-AND-PUSH ANIMATION if being clicked onto to simulate a pushed button and even more.
mwb_upd2.lha	VX	66K More icons in MagicWB style by Miki - I have tried to follow the same style as Martin Huttenloher. If some of you think that my icons are pretty much alike those from Martin, you're probably right. Many of the icons in this package are nothing more than repainted MagicWB icons. So, I don't take any credit, I give them to Martin instead.
neatstuf.lha	VX	34K Neat stuff by John E. Perry - This is a collection of icons for WB2.
tfcicon.lha	VX	4K Some cool icons made by Dark Raver of The Future Crew.
