Hey, you've found a Secret code!!! Type HWKL1 in Klondike to deal out one card at a time.

The Pyramid can only be solve though trial by fire!!! eek!

What is Hardwood Solitaire?

Hardwood Solitaire is a beautiful rendition of three popular solitaire games; [Klondike](#), [Pyramid](#) & [Golf](#).

HWS can be played in 256 or higher video modes. Even though it looks great in 256 colors, its true beauty is unlocked in [True Color](#). Then you can play with the Portrait card faces and choose from two more card backs.

How do I play?

There are three different solitaire games in the full version of Hardwood Solitaire; Klondike, Pyramid & Golf.

All three solitaire games have been chosen to be different types of play, and not just a variation.

You can play in TRUE COLOR!

Hardwood Solitaire is one of the few games that takes advantage of True Color, which will allow you to see your game in 16 MILLION COLORS.

That's over 65,000 times more colors than 256 color games!

So here's how you do it!

- 1 Click here  to view Display properties.
- 2 In the Color Palette list, select a High or True Color mode.

Note:

Your monitor and display adapter determine the maximum number of colors that can appear on your screen. So if you have a older video card, you might not be able to play in True Color mode, but it's likely that you will have a card that will at least display in 256 (The minimum requirement for Hardwood Solitaire.)

Ordering Hardwood Solitaire

Hit the print button above to print the order form so you can fill it out.

Name (Please Print) _____
E-mail Address _____
Address _____
City _____ State/Province _____
ZIP/POSTAL CODE _____ Country _____
Phone _____ Fax _____

☐ A Gray Alien gave it to me! Name: _____
☐ A friend gave it to me (If an alien, check above line!)
☐ Other: _____

Hey, if you have any comments, we'd love to hear from you!

Klondike

Place any Aces you get from the hand on one of the four foundations in the upper right hand corner. Once you place an Ace on a foundation, you can place a 2, 3, 4, etc. of the same suit there too.

The Tableau is built up, from cards you receive from the Hand ,by stacking them in descending order, alternating between red cards and black cards.

The object is to place all of the cards onto the foundations.

Card Values

Pyramid

Make a match with any open card on the pyramid or the Talon by dragging one card onto another card so that their values add up to 13. If you can't make a match, pull another card from the Hand. When you clear all the cards from the pyramid, you win.

Card Values

Golf

Match the card in the Talon with a card that has a value of one higher or one lower than the one from the Tableau. If you cannot make a match, pull another card from the Hand. When you place all the cards into the Talon you win!

Card Values

A pile where cards from the **Hand** are placed.

Remaining cards in the deck after all of the cards have been dealt to the Tableau. This is where you draw cards from.

The cards that are dealt out on the table in a pattern.

Secret Codes

**You think we're going to tell you..<BIG GRIN>
You'll have to figure them out yourself.**

A spot where you place your cards to win the game, i.e., the four groups at the top right corner of Klondike. Golf too has a foundation right next to the Hand..in this case it also doubles as the Talon
