

FreeWare from OsoSoft

The files on this sub-directory on The DISC! are freeware, and are copyright, 1991,1994 by OsoSoft. They may be used by individual users without registering, but may not be sold as part of any commercial program or collection of programs without express written permission from OsoSoft. They may, however, be included on disks sold as freeware or shareware or posted on online systems for public access. Specifically, these programs may not be included in any product marketed commercially without express written permission from OsoSoft. These files must be distributed as they appear on this disk, with no changes whatsoever.

Each program requires VBRUN300.DLL, included on this disk as VBRUN300.ZIP. Full documentation is in a WRI file with the same name as the EXE file for that program.

OsoSoft FreeWare Program List

OKFonts (OKFONTS.ZIP)

OKFonts is a freeware program for Windows 3.1 which helps users detect defective PostScript Type 1 and TrueType fonts. Since such defective fonts can cause crashes, the program is useful for anyone who uses many fonts or who downloads questionable fonts online. Documentation is in OKFONTS.WRI.

AutoWave (AUTOWAVE.ZIP)

AutoWave is a freeware program for Windows 3.1 which lets users play WAV files by double-clicking on the filename in the Windows File Manager. Documentation is in AUTOWAVE.WRI.

Nagger (NAGGER.ZIP)

Nagger is a freeware program for Windows 3.1 which acts as a virtual string around your finger. You configure it with a message, and the program displays the message at intervals you set. Optionally, you can also play WAV file at the same time, as an additional reminder. Use Nagger to help you relax, stop smoking, or to remind you to do anything on a regular basis. Documentation is in NAGGER.WRI.

SonoWave (SONOWAVE.ZIP)

SonoWave is a freeware program for Windows 3.1 which lets you explore WAV files to your heart's content. You can see WAV files in many ways, from an oscilloscope view to a sonogram view. Naturally, you can play WAV files, too. Documentation is in SONOWAVE.WRI.

DBmaker (DBMAKER.ZIP)

DBmaker is a freeware program for Windows 3.1 which lets you create dummy data for database testing. Create realistic looking data assembled at random from included library files. Create any structure to match your application. Use DBmaker, too to create fictional personal, company, and place names. Documentation is in DBMAKER.WRI.

Filer (FILER.ZIP)

Filer is a freeware program for Windows 3.1 which is the ultimate file utility for Windows. Search for files anywhere on your system--by filename or by contents. Search for up to 4 text strings in files, with boolean options and proximity. View graphics files, hear WAV files. Create custom associations to let you edit any file. Copy, move, delete files, too. Documentation is in FILER.WRI.

LOTSABMP (LOTSABMP.ZIP)

Over 250 BMP clip art files, in small sizes suitable for use on business cards and labels. All are black and white, and cover a wide range of subject matters. Perfect for use with OsoSoft's Rockford!, MultiLabel, and AdMaker applications. Try WinClip for viewing and printing catalogs of these clip art images.
