WinCLI Pro™ - New MS Windows™ 3.0 Product

Eschalon Development Inc. is proud to announce **WinCLI Pro** - a revolutionary new **command line interface** for **Microsoft Windows 3**. This new product brings an old idea back to the world of windows, icons, mice and program managers. Although **GUIs** constitute large productivity gains, sometimes there is nothing that can replace the speed of the command line. Most users can type "COPY C:*.EXE A:\" faster than they can pull out the **File Manager™**. For that reason, we bring you **WinCLI Pro**.

WinCLI Pro is a complete command line interface capable of running **Windows applications** as well as DOS™ applications. You can run **Notepad, Word For Windows™, Excel™** or **any other Windows application** simply by typing the program's name. No need for **Program Manager™ groups** or fiddling with the **File Manager**.

Of course you can do more with **WinCLI Pro** than just run applications. It also includes over 30 file management commands that are **built-in** to **WinCLI Pro** (ALIAS, ASSOCIATE, ATTRIB, CD, CLS, COPY, DATE, DEL, DIR, EXIT, FINDFILE, HELP, INFO, LABEL, MEM, MAKEDIR, MORE, MOVE, PATH, PROMPT, RENAME, RENDIR, RMDIR, SYSINFO, TIME, TITLE, VER, VERIFY, VOL, WHICH and many other **extended commands**).

Since **WinCLI Pro** is a **real Windows application** there is no need to shell out to DOS when you want to manage your files. You also do not need to type **exit** - just use the close box! **WinCLI Pro** will run in Windows' **Real, Standard** or **Enhanced** modes - a 80386™ is not required. You can now run a DOS-like prompt in a window on a 80286™ AT and even a 8088™ PC!

A normal DOS prompt uses **640 Kb all the time** - even when you aren't running a program. That means you are wasting **precious memory** that Windows could otherwise use for your word processor, spreadsheet or presentation program. **WinCLI Pro** requires **less than 40 Kb** and **only 2-3%** of system resources.

A complete programmers interface and full example source code is included (in both **Borland C++** and **Turbo Pascal for Windows**) allowing you to create your own **WinCLI Pro** commands. Already you can find some third-party and user commands in BBSes and on-line services such as **CompuServe**.

WinCLI Pro has **full clipboard support**, a **detailed help system**, **command line editing**, **command line history**, **aliases** (like Doskey™ macros in MS-DOS 5.0™), a **scroll-back buffer**, selectable font and adjustable colors. Also included in the package is a **complete File Manager** replacement, settings utility for **WinCLI Pro**, password system protector, **clock & screen saver** and various other small utilities.

WinCLI Pro is available for the suggest retail price of **only \$79.95**. For more information or to place your order (dealers and distributors welcome), please

contact us at (604) 520-1543, fax or voice.

Attention! Registered owners of either WinCLI (shareware version) or EDI Install will receive a 50% discount on the retail price of WinCLI Pro! Don't miss out on this \$49.95 special offer!
