Microsoft Consultant Relations Program

The Microsoft Consultant Relations Program (CRP) is designed for independent microcomputer consultants to help maximize the success of their business. In the program there are Associate consultants and Partner consultants. To qualify as an Associate CRP consultant you must first pass the Microsoft Certified Professional exams for MS-DOS/MicroHardware and Microsoft Windows, and submit an application. To qualify as a "Partner," you must first be an Associate and then take an application specific exam (for example, MS Excel and MS Word for Windows), submit sample code, references, and an application.

As an "Associate," you will receive substantial discounts on selected Microsoft products, a quarterly newsletter, a private CompuServe forum, and priority access to Microsoft technical support. As a "Partner," you also receive business referrals, beta testing opportunities, a regular monthly CD-ROM disk containing selected products and the contents of the Microsoft technical support database, and a license to use the "Microsoft Consultant Relations Partner" logo. For more information, call 800/227-4679.

If you are a customer in need of assistance from a Microsoft Consultant Relations Partner, please call 800/227-4679 and ask for the CRP Referral Specialist.

Microsoft Certified Professional Program

Microsoft Windows

Operating System Version 3.1 Administration Exam Topics

If you're a support coordinator, support engineer, systems engineer, reseller sales support engineer, consultant network administrator, or anyone else who must gain and display technical expertise in Microsoft Windows, you should become a Microsoft Windows Certified Professional. Current certification

Windows version 3.1 – demonstrates that you are the source of MS-DOS Mode and Windows Mode installation events

Windows. When a new version of Windows is released, you will be notified and you will be given the allotted time to complete any new requirements for maintaining current certification status.

Upon successful completion of the Microsoft Windows Certified Professional requirements, you will receive a Welcome Kit that contains a Membership Card, Product Certification Certificate, CompuServe Intro Kit, product specific newsletter, a listing in the Microsoft Certified Professional Directory, and more.

To obtain the latest Microsoft Certified Professional brochure or if you have any questions about the Microsoft Certified Professional Program, please call Microsoft Inside Sales – System Software at 800/227-4679.

Customizing Setup Express and Custom Setup SYSTEM.INI, WIN.INI, and PROGRAM.INI

The Windows Files

Windows core components
Dynamic-link libraries
Files required for Windows to run in standard mode
Files required for Windows to run in 386 enhanced mode

Memory Management

Conventional, expanded, extended, and virtual memory
Loading MS-DOS into the HMA and advantages of MS-DOS 5
UMB: characteristics, loading device drivers
Standard mode: characteristics, minimum memory and hardware requirements
386 enhanced mode: characteristics, minimum memory and hardware requirements
Using conventional, expanded, extended, and virtual memory
Expanded memory LIM 3.2 and 4.0 specifications
Swap files
Temporary and permanent swap files
HIMEM.SYS in Windows
EMM386.EXE in Windows
SMARTDRV.EXE in Windows
Windows system resources

Fonts and Printing

Typefaces and fonts
Windows screen font and a Windows printer font
Raster and vector screen fonts
TrueType fonts and standard fonts
Types of Windows printer fonts
LPTx.DOS port
Supporting COM3 and COM4 with Windows

Non-Windows Applications and PIFs

PIFs and PIF editor
Levels of non-Windows application support provided in standard mode and 386 enhanced modes
_DEFAULT.PIF

Networks

Installing and sharing Windows on a network
Setting up a Windows workstation with Windows installed locally
Setting up a diskless Windows workstation
Locations of each of the key files if running Windows from an attached file server
Advantages and disadvantages of setting up a network with Windows installed locally or from a file server
Network persistence feature of Windows
Winnet API
Network drivers and virtual network driver

Microsoft Authorized Training Centers

Microsoft Authorized Training Centers offer the most up-to-date Microsoft product information, courseware, and instructional techniques. Accreditation and support from Microsoft is your assurance of training that meets the highest professional standards. In addition to user training, most Authorized Training Centers offer a variety of services, including customized training, training of other courses, courseware development, consulting services, and other out-of-classroom support.

To maximize the powerful productivity of Microsoft software, contact your nearby Microsoft Authorized Training Center by calling 800/426-9400.

ATC Training Services and Products

The following is a list of Authorized Training Centers (ATCs). This list is current as of February 10, 1992. For an up-to-date listing of the Microsoft third-party training organizations, please call Microsoft Sales and Services at 800/227-4679.

Technical Training When and Where You Need It:

Microsoft University

Microsoft University provides a proven curriculum of skilled staff of experts dedicated to launching courses that meet our customers' needs. Since 1987, over 25,000 software developers, programmers, support and systems engineers, and MIS managers have attended Microsoft University for hands-on training.

Microsoft University offers an integrated curriculum on Microsoft Windows, Microsoft Visual Basic, Microsoft C and C++, LAN Manager, Microsoft SQL Server, Microsoft OS/2, and Microsoft OS/2 Presentation Manager.

Microsoft University offers training at ten regional training facilities: Atlanta, Boston, Chicago, Dallas, Los Angeles, New York, San Francisco, Seattle, Toronto, and Washington, D.C., as well as technical training through the Microsoft international subsidiaries.

A Hands-On Approach to Learning

At Microsoft University, we believe that the proof of excellent training is in a student's ability to apply it. All Microsoft University skill-based courses are lab-based; the labs are designed as an integral part of the course. We provide a unique learning environment and exceptionally qualified instructors who combine real-world experience with academic excellence. Our classrooms are furnished with state-of-the-art hardware and classroom equipment.

Schedule an On-Site Course at Your Facility of Ours

Based on a survey of hundreds of companies, hundreds of companies have found that hosting a Microsoft University course at their location is a cost-effective way to leverage their training dollars. We provide the instructor, student materials, and expertise. On-site training also provides the opportunity to discuss product strategy and design issues more openly than might be appropriate in a more public setting. Companies can rent a classroom in any of our ten regional facilities to host a Microsoft University course for their own employees.

Video Training: Fast-Forward Your Skill Development

Microsoft University recently introduced a powerful series of technical video courses to give you additional flexibility to meet your ongoing training needs. Video courses are comprehensive, timely, and cost-effective. In addition, they offer an added benefit—a permanent resource for training new employees at a moment's notice. Microsoft University video courses boldly illustrate technical concepts through 3-D animation, lecture, and demonstrations. Hands-on lab exercises and a student guide reinforce the learning experience.

Custom Courses Expand Your Training Options

Unique training needs call for a custom course -- one developed with your specific goals in mind. Because we work with you to develop cost-effective solutions, you can take full advantage of your initial training investment now -- and in the future. Custom courses may be delivered on-site by Microsoft University or licensed for delivery by your internal training organization.

Licensing Programs Present a Global Opportunity

Corporations that need to train more than 20 employees on Microsoft systems have found many advantages in the Microsoft University licensing program. You receive timely, hands-on technical courses from the vendor of the product while bypassing the high cost of developing your own course. And you have the ultimate flexibility to have your own internal training organization deliver the course at any time, to any number of employees, in any of your offices.

Management Education Seminars Enlighten Decision Makers

As new platforms mature and economic pressures increase, leveraging your investment in information technology becomes increasingly important. Microsoft University has pioneered a series of high-level executive seminars and video briefings that address the organizational issues, methodology, and life cycles of new information technologies. These seminars are offered as public seminars and are also ideally suited and cost-effective for presentation at your location.

Training for Developers Using Microsoft Windows 3.1

Microsoft University recognizes the tremendous need for timely, relevant training on the Microsoft Windows operating system version 3.1. We have provided hands-on technical training for Microsoft Windows since its first internal release, and continue to expand our curriculum with courses that provide solutions for your most pressing development needs.

Fundamentals of Microsoft Windows Programming

\$1595* per video course; \$249 each additional set of student materials

This course is for experienced software developers who want to learn the fundamentals of creating applications for the Microsoft Windows operating system. This course covers the material similar to the Microsoft Windows Programming Environment course and prepares students for the Microsoft Windows Programming Advanced Topics course. Instruction is a mix of lecture and hands-on lab work designed to provide a broad-based foundation of programming skills in Windows. In addition to creating basic applications in Windows, students will learn how to use the Windows messaging system; implement basic user interface objects, such as windows, menus, and dialog boxes; and understand basic memory management techniques.

Microsoft Windows Programming Environment

Five days, \$1500 per person

In this course, students create a basic application that displays a window. As the course progresses, increasing functionality is added to the application, such as menus, dialog boxes, and text. Students will learn to recognize and apply the basic elements of the Microsoft Windows application programming interface (API). At course completion, students will know how to use the Windows messaging system and basic memory management techniques, implement basic user interface objects, and create basic Windows applications.

Microsoft Windows Programming—Advanced Topics

Five days, \$1500 per person

This intensive course is for experienced programmers who want in-depth information on various aspects of development for Windows.

Students study user interface considerations, advanced menus, the help system, windowing, user data entry, advanced dialog boxes, multi-tasking, and the graphics device interface (GDI). At course completion, students will know how to create multiple document interface (MDI) applications, implement dynamic data exchange (DDE), and make full use of memory and the processor.

Exploring Controls: Video Training for Developers Using the Microsoft Windows Environment

\$495* per video course; \$99 each additional set of student materials

This video course is for experienced software developers who want to understand how to implement controls for Microsoft Windows applications. It explores various controls in the Microsoft Windows graphical environment, including buttons, static controls, edit controls, list boxes, combo boxes, scroll bars, and custom controls. Students will learn techniques for creating, managing, and using controls, including advanced techniques to use when a standard Windows control doesn't meet an application's requirements. Technical concepts are visually illustrated through 3-D animation and reinforced with hands-on lab exercises and a student guide.

Microsoft Visual Basic—Discovery

Two days, \$600 per person

Coming Soon! This course helps students become familiar with the Microsoft Visual Basic programming system. The course covers structured programming and applications development for Microsoft Windows and prepares students to develop prototypes or simple multiple form applications. The Discovery course is the stepping stone to more advanced Visual Basic programming courses.

Microsoft Visual Basic Programming

Three days, \$900 per person

This course is for programmers who have experience with structured programming languages and want to develop Windows applications using the Microsoft Visual Basic programming system for Microsoft Windows. The course teaches students the features and capabilities of the Visual Basic programming system, as well as the concepts needed to write sophisticated, event-driven graphical programs.

Advanced Programming for Microsoft Visual Basic

Three days, \$900 per person

Coming Soon! This course introduces the advanced features of Microsoft Visual Basic. Students learn how to implement object linking and embedding (OLE), multiple document interface (MDI), advanced memory management, and optimization techniques. At course completion, students will know how to use these features, along with other Visual Basic tools, to add advanced capabilities and robustness to their applications for the Microsoft Windows environment.

Application Development Using Microsoft Excel 4.0

Three days, \$900 per person

Coming Soon! An exciting new course for systems analysts, support engineers, and MIS professionals. The course assumes that students know how to build a simple spreadsheet, format cells, and create charts. Students will learn usage of macro code, dialog boxes, menus, and an introduction to dynamic data exchange (DDE). Students also explore advanced topics such as object oriented dialog boxes. At course completion, students will be able to create robust and flexible applications based on the Microsoft Excel 4.0 macro language.

* Offer good only in the 50 United States. A charge of \$7.50 shipping and handling, plus applicable state sales taxes, will be added to each video course order.

Training for Support Professionals Using Microsoft Windows 3.1

Microsoft University offers a comprehensive curriculum of hands-on courses to help support professionals optimize and customize computing platforms and improve their troubleshooting skills. These courses are based on Microsoft Windows 3.1, providing a timely opportunity to get a head start on this important new software release.

MS-DOS 5 Installation and Optimization: Video Training for Support Engineers and Advanced Users

\$149* per video course

This short video course consolidates all the information support engineers and advanced users need to successfully install, optimize, customize, and support MS-DOS 5 on a group of PCs. The course features live demonstrations, 3-D animation, and screen displays to communicate technical information. Students learn how to optimize MS-DOS 5, automate the installation for multiple machines on a network, and customize the MS-DOS 5 shell to meet an organization's needs. In addition, students will be able to show end-users how they can take advantage of the new features of MS-DOS 5.

Microsoft Windows for Support Professionals

Four days, \$1200 per person

This in-depth course introduces support professionals to the basic knowledge and skills needed to support users of Windows 3.1. These skills revolve around installation, optimization, customization, and support of the Windows operating system rather than the support of specific applications running under Windows. Students will be learn how Windows operates and will be able to optimize and customize Windows, automate the installation process over a network, and troubleshoot common problems encountered by end users. Lectures are supplemented with hands-on lab exercises to help you apply what you've learned immediately.

Upgrading to Microsoft Windows 3.1: Video Training for Support Professionals

\$395* per video course; \$99 each additional set of student materials

This fast-paced video course helps experienced Windows 3.0 support professionals learn the new features of Windows 3.1. Students will gain the technical expertise needed to support this upgrade throughout an organization. The course assumes extensive knowledge of Windows 3.0 and focuses on the new features and enhancements of Windows 3.1, including object linking and embedding (OLE), TrueType fonts, and new .INI and .INF files. Students will learn to optimize and customize Windows 3.1, automate the installation process over a network, and troubleshoot common problems encountered by end users. Technical concepts and skills are visually illustrated through demonstrations and 3-D animation, and reinforced through hands-on lab exercises and a student guide.

* Offer good only in the 50 United States. A charge of \$7.50 shipping and handling, plus applicable state sales taxes, will be added to each video course order.

Microsoft University Authorized Training Centers

Take the Microsoft Windows for Support Professionals course closer to home. Because of student demand, now you can take the Microsoft Windows for Support Professionals course at Microsoft University authorized training centers across the country. The Microsoft University Training Alliance members listed here are licensed to teach this comprehensive course on installing, optimizing, customizing, and supporting the Microsoft Windows 3.1 graphical environment.

Contact these organizations directly for schedule information or to register for a course. Our program is rapidly expanding with new locations. For information on Microsoft University Training Alliance members opening soon in your area, call Microsoft University at 206/828-1507. When your representative answers, please mention Department 812.

M_505.

The following are online Windows library services. These services are available by calling the numbers listed or by contacting the commercial networks suggested.

Windows Driver Library

The Windows Driver Library is for all users of Windows who own peripheral devices not supported in the Windows retail package.

The WDL will include the Windows 3.1 compatible device drivers that are not included in the Windows 3.1 retail box, including Printer, Display, Network, Fastdisk and VDD and Grabbers for the display drivers. All drivers in the WDL are compatibility tested by Microsoft. The WDL will be updated regularly as new and improved drivers become available.

The WDL will be distributed on network services including CompuServe, GENie, ONLine, APCUG, and Microsoft PSS Download Service. The WDL is free of charge when downloaded from these services. The WDL is also available for a \$20 fee from Microsoft Customer Service at 800/426-9400.

The Windows
Technical Support Library

This service will help users who are either PC support professionals or who support Windows users in their organization. This Library provides better and faster access to the information needed to solve Windows technical support problems. It will also help you update and customize the Windows Resource Kits with up-to-date technical information related to specific applications, hardware devices, and networks.

The Windows Technical Support Library will be available by referencing the appropriate forums on network services such as GENie and CompuServe or free of charge by calling Microsoft PSS Download Service. To have information faxed or mailed call Microsoft Product Support Services.

User Groups

The following is a list of some top user groups. Although phone numbers are given, we suggest when possible that correspondence be directed to the address given. For the most updated information about user groups near you, call 800/426-9400 to speak to a Microsoft operator who will give you the most recent address information.
