Installing WiNstack

While it is possible to run WiNstack by simply double-clicking on the file WINSTACK.HLP in File Manager, you will probably want to install it as a Program Manager icon, to make it more readily available. This section describes two ways to do this.

Installation by drag-and-drop:

Simply drag the file from File Manager to the Program Manager program group that you wish to install WiNstack in using the mouse.

Installation using Program Manager:

Select the program group which you would like to place WiNstack in. Choose File, New... from the Program Manager menu bar. Select the 'Program Item' radio button from the resulting dialog box, and press OK. Now type the description (the label you will see below the icon in Program Manager -- this can be anything you like) in the labeled edit box. Press the 'Browse' button, type WINSTACK.HLP and then press enter in the File dialog which results. Select the directory which you placed WINSTACK.HLP in, and press OK. Finally, press the OK button on the Program Item Properties dialog box.
