

Dart Communications PowerTCP™ Demonstration Disk

This description applies only if you have downloaded the PowerTCP Demo from a public server.

PowerTCP is Dart Communications' second generation of TCP/IP tools for Windows that are Windows Sockets V1.1 compliant. The full commercial SDK has 16 and 32 bit C and C++ interfaces, plus Visual Basic™ custom controls for many TCP/IP protocols. Sample applications are included for each interface, plus a 150 page developers manual and online help files. For distribution of developed applications, the developer has several distribution licensing options (See licenses.wri).

About this demonstration disk

This demonstration disk is provided so you can 'try before you buy' our commercial version. Several features have been removed for this demonstration disk to encourage you to purchase the full version. This demo version provides the following "cripples"

- Connections will only last for a limited number of minutes

Also, this demonstration version does not include:

- 32 bit support
- C++ static libraries
- The 150 page developer's guide
