9/28/93

This diskette contains the WaveLAN NT NDIS 3.0 device driver v1.0a

To install, start the Network Control Panel applet and select `Add Adapter`. When prompted for the type of adapter, select `<Other - Requires disk from Manufacturer>`. Supply the directory where the WaveLAN file OEMSETNT.INF exists. Finally, provide the correct MCA slot number or ISA I/O base address. Exit the Network Control Panel applet by selecting OK and allow it to reboot your system.
