

Start Game

Once you have selected your player, the game will open up with your player. In this game mode, you must tell the player which direction to look. You can only change the direction you're looking while on the ground.

Enemies

You will encounter a variety of enemies during the game, but you'll have to find them for yourself.

Teleporting

Teleporters are found everywhere in the game. When using a teleporter, you can be teleported somewhere on the same level, the next level, or a bonus level.
