

he easy-to-use time tracking program for the Macintosh®.
System 7 or greater is now required for TimeTracker.

TimeTracker is Shareware - you may try the program for a short time, but if you like it and want to keep using it, please send in the requested \$25 registration fee. A lot of time and effort went into developing this program, please be fair and help support it.

Please read this manual. It is short and easy to read.

This manual was written using DOCMaker, the shareware document creator from Green Mountain Software. If you have any problems using or printing from this manual, contact Green Mountain Software at <mswall@aol.com> or <greenmtn@Traveller.com>. If you have questions about TimeTracker, contact Maui Software.

Feel free to submit comments, suggestions, and bug reports.
