

## ADCRV;Fetch 3.0.1

Welcome to the latest official release of Dartmouth's FTP client for Macintosh. This installer lets you choose between copying a copy with native Macintosh kind of Macintosh "fat binary" or with native Macintosh kind of Macintosh "fat binary". It also provides a bookmark file for the Macintosh. In the Internet Config file, it sets up the Macintosh to use the Macintosh. Thanks to Aladdin Systems for their Macintosh technology.

Note:  
This installer requires a hard disk with 400-500K of free space.

For more information, please contact the Dartmouth FTP client development team at [ftp@dartmouth.edu](mailto:ftp@dartmouth.edu).
