

## Edit a Picture

### >>> To edit a picture

- 1 Be sure the picture you wish to edit is selected. Click on the thumbnail to select it, if necessary.
- 2 Click the Edit button. The HP PicturePlace Editor software starts and the selected picture appears there, ready for minor modifications. Help topics that explain how to edit the picture are available within the HP PicturePlace Editor.

### >>> Hints

There are two other ways available to start the HP PicturePlace Editor software from within HP PicturePlace. One way is to click on the desired thumbnail and then from the File menu, choose Open Selection. Another way is to double-click on the desired thumbnail.
