Xcom 2 only: Here's an unconventional way to enter the larger subs ↔  
if

you have Mag. Ion armor: look for overhanging corners that take up exactly half of the map square. Stand directly under one, and go up. You will be partly in, partly out of the sub. From here you can walk right in through the wall, but you can't go back, so be careful. You can even go up multiple floors on ships like the Dreadnought, bypassing the winding passages and taking a shortcut to the command center if you like. This is especially useful for taking out a pesky alien commander who is hitting you with M.C. control all the time.

If you keep going and going south, you will soon come to a River that is kinda like a small pond, if you go a little to the right or left (forgot which way) you will see a Underwater Cave, then go in, keep on going through the Cave After going a little, you will come to some fruit.

(2) Get more people Quick:

If you go south of your village, you will come to the Big Stone Tablets, pick the one called "Fertility" this will help increase people in you're tribe in the begining of the game. Now after getting this Tattoo go and eat A LOT!! And I mean a lot, then you will have lotsa people to start out with.

### Jack's Dark Sweep

Cast Jack's 'Shadowbind' Then on the next turn, provided the enemy is still paralyzed, cast Shadowbind to do the "Dark Sweep"

### Item Duplication Glitch

Make sure the item you want to duplicate is exactly one (say power apple). Go into battle.

In the first round, have Rudy use an item such as heal berry or medicine. Have Jack switch the position of heal berry with power apple and then defend.

Have Cecilia defend.

In the second round, have Rudy use heal berry again, notice that the power apple is now gone.

Have Jack switch back the position of heal berry and power apple (now empty space), defend.

Have Cecilia defend.

In the third round, look at the inventory. Now you have 255 power apples Use the same procedure for other items such as apples/secret signs/ambrosia.

### Secret Aliens

There are secret aliens in Wild Arms. Go to the three islands located in the southern most region of the map. After fighting 8 to 10 battles, you will then battle a secret alien race known as the Hayokonton. On top of all the exp. and gella you'll receive from them, they sometimes give you duplicators.

### Enter the Abyss

To get to the secret dungeon "The Abyss" and battle the mythical mother of all monsters Rago Ragla (or something like that), walk up to the glowing

green Elw transporters in the Elw pyramids and push the floor right in front of them with Rudy's power glove tool. After you punch a few times walk up while continuing to punch and enter the teleporter. If done right the screen will flash red and you'll be taken to "The Abyss". The Abyss is a place of powerful, annoying monsters and valuable treasure. Rago Ragla at the end is definitely the most difficult monster in the game. Equip the Goat Dolls before you fight him because one of his attacks can do 6000 points of damage to all characters in one round.

-If you go into the ancient arena go to the back, get to the second floor, you will see a mirror. If you have Rudy's gloves, you can break the mirror and then there is 5 doors seals with magics. You need five duplicator keys to open all doors. (you can get the duplicator key one at a time by beating four monsters in a row in the arena) Then you will fight with another powerful monster and if you win, you will get the most powerful sword for jack (juggernaut sword).

### Vandal Hearts

In Chapter 2, after the battle in the swamp and before encountering Magnus, you need to pass thru the battle which contains the two elevators and the two healing Cs. Before you enter this battle, stock everyone up with mage oil except Ash. Now go clear up the level(monsters), but don't go near the temple yet. Have your bishop(Sara) stand on one of the healing Cs and cast mystic shield on herself repeatedly. You need to cast it six times to raise a level. Continue doing this until she reach Level 49 (Max).

Now have Huxley(Bishop/Monk) cast mystic shield on her and watch the sudden jump in his level(to level 46). Do this a few more times to max at level 49. As for those people in your party who couldn't cast mystic shield, have them use mage oil on those two characters and watch them transform into superheroes.

**\*\*Warning\*\*** Don't try to do this trick to Ash because you will face problems later in completing all six trials. Keep Ash's level consistent with the flow of game.

After you completed the sixth trials and turn Ash into "Demigod", do this trick with his new found magical abilities and he will be completely unstoppable

Other hidden things I've found so far: 2 mushrooms--1 in the scenario where the Crimson guard cuts down the rioters. Search a cracked piece of sidewalk near the river beside the house. 1 in the scenario with the zombified villagers controlled by statues. Near the treasure chest right next to the house, there is a t-shaped raised portion of land, with an odd-looking patch in the middle--search the odd looking patch.

If you want to attain the vandaliar class, you must have all the 6 keys. after attaining a key, fight in the dojo to exchange for a prism.

1. Nova key
2. Key of earth
3. Mage key
4. Key of chaos
5. Lagos Key
6. key of heaven

location of the keys are as follows,

Nova key - After defeatig the dune monsters, go back to the village and talk to a young lady in the tavern.

Key of Earth - In the battle where kira runs off there is a cross shape swarm at the right of the map, in the centre is the banana. return it to the guy in the tavern. He will hand the key to you.

Key of chaos - The key involves searching for the 3 treasure. Macroman, Tacrot and Ramen. The macroman is locate in a circle where the mad soldiers first arrive the first time you meet dolan... I have forgotten where the tacrot is. The Ramen is where you fight Dallas on the train,

it is on the first track, examine the grill. After acquiring all the items exchange it with the merchant at Diego's hometown.  
Mage key - Where Eleni escape into the courtyard of the prison. On the outer perimeter you see a shape like a seashell.  
Lagos key - where you fight the salamander, it is in the centre of the lava pool near the salamander.  
Key of Heaven - you must have all 5 prism before you get the key from a weird guy in the last town at chapter 6.

Fighting for the prisms may be difficult but it worth it for the vandaliar. The vandaliar will have all magic and items including enemies's magic (try plasma wave).

## 1.203 Intro

INTRO

Playstation cheats are in ENGLISH not GERMAN  
These are for NTSC Version as far as I concered but they may work on PAL versions. This list is rather incomplete as they are a list for the Games I and my mates have. But I will be expanding the list if people want me to. So if you do then just E-Mail me otherwise I can't be bothered.

I guess From the begining where there was only 20 cheats now there is over 130+ cheats and in it's in it's fifth version.

Playstation Guide is a Amigaguide / Multiview collection of Sony PSX cheats and solutions. This Guide is in English unlike the other guide which is in German. I will update this guide whenever possible.

The Author hold no responsibility for any damage caused by this guide. Like you brain exploding from too much info or losing all your hair. The information is provided as is. Which may or may not be entirely accurate and knowing myself probably not.

The Author hold the right to make mistakes, errors and swear.  
And NO you may not modify the damn thing.

Will NOT extract to it's own directory
