#### Float Combos!

All characters now have a df+B attack which sends the opponent into the air. If the attack is a "counter" (struck while the opponent is attacking you), you have the option of attacking them with a variety of moves before they hit the ground.

To add even more damage, you have time to add your ground attack at the end!

Also note that there are specific moves for each character which may permit float combos.

#### Weapon Defense Power

Each time an opponent strikes you with a special attack or combination of attacks, you will lose weapon power. The Bar is under your health bar. When lost, you lose your weapon, and must use hand skills to win the round. The bar rejuvenates some power each round.

#### Guard Impact

The new Guard impact is f+G. If someone attacks you when the guard impact is active, you'll flash for a second, and have time to counter the attack while your opponent recoils. It can be done at any time, so practice the timing while your NOT being slaughtered.

NOTE: You cannot Guard Impact Kicks.

#### Ending Stances

Each character has a total of 6 ending stances, 4 winning, 2 losing. The Winning stances are each achieved depending upon which button related action was last during the match, A,B, or K. The fourth is=

the unarmed stance. The two losing stances are only possible through a Time-Out. The armed stances differ, but losing by Time-Out while unarmed gives the same effect for all characters; they all lower their heads while standing, hands on knees.

## Critical Edge=92s

Critical Edge=92s are automatic four hit combos which every fighter posses by pressing A,B, & K at the same time. In order to activate the Critical Edge, you must have sufficient weapon power which is used by the CE (33%). Critical Edge Extensions are movements made during a CE=92s 4 attacks in order to add an extra three to four hits to the auto combo, depending on the character. =

NOTE: If your Critical Edge is Guard Impacted, you will lose 50% of your sword power rather than the usual 33%.

## Unblockable &amp; Critical Edge Cancelling

Both of these attacks can be cancelled by pressing the Guard Button (G). In addition, most characters can perform =93flash attacks=94 after a cancelling these moves. By cancelling and quickly following with A and/or B attacks, the weapon trail will follow while the Unblockable or Critical Edge power goes down.
