History

1.1 History

History

- V1.87- Added unit tooltype to change the unit of the used device (and a corresponding gadget of course)
 - again shrunk the testpage a bit for use with letter format
 - V1.86- Removed some bugs introduced with V1.83/1.84
 - Added some colored blocks to the nozzlecheck (all printers) (thanks again to Willem Schaaïj)
 - V1.85- Removed one linefeed in the testpage
 - started to implement calibration for ES(C)200, but it seems there is the same problem as with the ESC2s (I can't test this actual without such a printer!)
 - V1.84- Added some more character tables for the ESC200 and the ES200 (there is a cycle gadget now otherwise the window would be too high)
 - Added Tooltype "SETCOLORS" to switch the palette fix on/off
 - Changed the gui a bit
 - V1.83- Added italian guide by Eliseo Bianchi
 - Added polish catalog by Adam Bartniczak
 - Added hungarian catalog by Varga Lajos
 - Fixed the problem with the GVP IO-Extender
 - Removed the startup requester
 - Fixed the MWB-palette problem
 - V1.82- Added calibration for ESC500
 - Added some ESC1520 support
 - History is now a single file
 - Added russian catalog from Efim Shuvikov
 - ESC300 only supports capital letters - adjusted in this way
 - More strings localized
 - Reduced stack usage
 - V1.81 *** this version requires more than 4kb stack ***
 - *** recommended, to set 8192 in the icon info ***
 - Fixed a bug with tooltypes for ESC2 support
-

- NOT all catalogs are updated !!!
- V1.80- Fixed a second bug with the tooltype CALIBVALUE0 and 1
- V1.79- Added headcleaning support for ES200/ESC200
- Changed the device controlling again - now synchronous (but didn't work again with the gvpar.device. Arrgh, is there anybody out there who know where is the problem with this device? -> Please write me!)
- V1.78- Changed GVPPAR0: to PAR: (didn't work)
- Fixed a little bug with the tooltypes CALIBVALUE0 and 1
 - Changed the device controlling to support the gvpar.device
- V1.77- Changed PAR: into GVPPAR0:
- Calibration settings are now saved to the tooltypes
 - Some bugfixes
 - Added again the button for printer reset (works now)
 - Changed the test page
 - Added an overworked icon by Philip Stefan
- V1.76- Removed reset button (no space and it didn't work)
- Added test page printing (designed for ESC)
 - Changed bidir calibration for ESC
 - Removed duart.device (did not work)
 - Added gvpar.device
- V1.75 (internal Testrelease)
- Added a reset button for the printer
 - Removed setup for ESPhoto because this ist not supported by this printer
- V1.74- Improved and reworked Amigaguide doc's (English)
- Removed choice of head to clean for ESPhoto because this one can only clean both heads together
 - Removed setup function for ESC400 because it's not supported by this printer
 - Support nozzlecheck, headcleaning and calibration for ESC300
 - Support nozzlecheck and setup for Stylus 200
 - All windows are now activated when opened
 - Removed .cfg file, now settings are saved in tooltypes
 - Devicename is now saved
 - Added dutch documentation
 - Added Tooltype SHOWGFX to disable wrong colored gfx
- V1.73- Hungarian catalog included (Thanks to Varga Lajos)
- Fixed some problems with the mouse events
 - Windows open in the middle of the visible screen (Thanks to Bahman Moallem)
 - Other little bugfixes
 - Headcleaning support for ESPro(XL)
- V1.72- Changed the calibration for ESC2s and ES820 (I hope it works now)
- V1.71- Removed pitch setting for ESC (not supported by the printer)
- Added setup for ESPro and ESPro XL
-

- Added calibration for ESPro and ESPro XL
 - Changed nozzlecheck for ESC2 to 20 nozzles
 - Added nozzlecheck for ESC200/ESC500
- V1.7 - Internal changes
- Added a little documentation
- V1.69- Printer setup support for ESC2s and ES820
- Nozzlecheck for ESC2, ESC2s, ES820
- V1.68- Calibration support for ESCII finished but not tested
- V1.67- Bugfixes and some internal changes
- V1.66- Calibration support for ESCII (under construction)
- (3 of 5 finished)
 - (this is the most complex calibration of all printers)
 - "More"-Gadget for an "About" window
- V1.65- Calibration support for ESCII (under construction)
- (1 of 5 finished)
- V1.64- Calibration support for ESCIIs/820
- V1.63- Worked out gui (gfx and icon by Tilo Steiner)
- V1.62- Device is now used in shared mode
- Real WBstart
- V1.6 - Bugfix for ESC-Printersetup (didn't save correct)
- (Thanks to K.Reiser and pRIME1)
 - Bugfix for ESC/Pro-nozzlecheck
 - Bugfix for ESPhoto support
 - Spanish readme included (Thanks to D. Domínguez)
 - .cd file included - Please send me your translation
- V1.56- Full Epson Stylus Photo support (but not tested)
- (please write if you have one!)
 - Nozzlecheck for ESC and Stylus Pro
 - Headcleaning for ESCIIs and Stylus820
- V1.54- Started to support the ESC2 (PrinterPrefs)
- Corrected the wrong order of infobox strings
- V1.52- Removed a bug when calibrating the ESC
- Added verify pattern for ESC400/600/800
- V1.5 - Improved fontsensitivity again
- Removed some bugs (ESC support)
 - Editable devicename for output device
 - (devicename will not be saved in this version)
 - More texts with locale support
- V1.44- Removed some enforcer hits
- Included Dutch catalog from Willem Schaaïj
- V1.43- Improved fontsensitivity
-

- Multidevice support
 - Bugfixes
 - Support a special mode for catalog development
 - Included Swedish catalog from Krister Larsson
 - Included French catalog from Gilles Vigner
- V1.4 - More texts with locale-support
- Now check the printerstatus before sending data
- V1.3 - Added support for ESC (calibration and head cleaning)
- Reworked some requesters
 - Included Spanish catalog from D.Dominguez
(added texts in V1.3 are in English)
- V1.2 - Added load config when program starts
and save config when program quits
- Fixed a bug when opening libraries
(ESC-Util wants to open V39 instead of V38
Thanks to Ken Green)
- V1.1 - Added support for printer-setup
(Font, Chartable, Printdirection, Autolinefeed, Network I/F,
I/F-Mode, Economy-Mode, Smallfont, Printspeed)
- Added support for ESC/200/500/400
 - Improve the gui (i hope now it is more fontsensitive)
 - Localized (german and English)
 - Only one program for all printers
- V1.0 - First public release
-
