Chapter 1

fmsx_games

1.1 "

Games

I regularly test MSX games with fMSX Amiga. Of course, occasionally a change to the system will mean that programs that used to run no longer do so, but on the whole, the information in this section should give a good indication of what works and what doesn't. Of course if you have any additions or spot mistakes, please let me know!

Sometimes it can be hard to determine if a program is in fact operating correctly. The fact that a great many MSX programs are in Japanese doesn't help either.

The games have been divided into categories. The following categories are available:

Disk games

These games fill one or more disks.

Disk-based games

Many of these games fit on a disk.

16K and 32K ROMs

Larger ROMs

Tape-based games

The following list of games comes especially recommended!

Recommended games

1.2 "

Recommended games

RPGs

S.D. Snatcher	Extremely cool cyberpunk adventure.
Metal Gear 1 or 2	Great "covert tactical operation" games.
Dragonslayer 6: Legend of Heroes	Extremely well-done Final Fantasy-style RPG.
Ys 1, 2, or 3	More fantasy.

All these games have been translated to English. Try to get English versions, because the Japanese originals are very hard to understand if you do not know the language.

Shoot'em-ups

Space Manbow	Great gameplay, great graphics, great music. The best.
Firebird	Another classic. Find map parts to open new sections.
Aleste 1 or 2	Great vertical shooters...
Nemesis 1, 2 or 3	...and great horizontal ones...
Salamander	...and another...
Parodius	...and to top it off, a spoof Nemesis game!
Laydock	Terrific graphics, but a bit slow.
T.N.T.	More great graphics, but a bit unfriendly to control.
Undeathline	Rather difficult but very pretty.
Strategic Mars	Not very pretty, but compelling to play somehow.

Laydock was the first MSX2 game I ever saw, back in 1985. I was totally amazed by the quality of the graphics, and even today they don't look that bad!

Puzzle games

Eggerland Mystery 1 & 2	Hundreds of levels of puzzling pleasure.
Kings Valley 2	Fun puzzle game. Be sure to get the MSX2 version.

Miscellaneous

F1 Spirit	Fun racing game.
Penguin Adventure	Unique racing game, featuring penguins instead of cars.
Feedback	Space Harrier-like game. Impressive stuff for MSX.
Firehawk	A transformer battles its way through a platform world.

1.3 "

Disk games

These are games that fill one or more disks completely. They are usually for MSX2, and often support the FM-Pac. Unfortunately they are almost always in Japanese, and are impossible (or very hard) to play without knowledge of that language.

The "Jap.?" column lists whether or not you can play the game if you do not know Japanese. The following markings are used:

Y = Knowledge of Japanese language is required.

N = You can figure it out without having to know Japanese.

E = You can play without knowing Japanese, but it is going to take some effort.

Disk-based games

These are games that come in disk-loadable form these days, but were originally sold as either tape-based games or cartridges. Many games of this type fit on one disk, and a BASIC or DOS command is needed to load them.

MegaROMs

MegaROMs are cartridges that are larger than 32K. Normally the MSX can only use cartridges of 32K or smaller, but thanks to special circuitry inside the cartridge it has become possible to use larger cartridge sizes.

Unfortunately this special hardware is different from cartridge to cartridge. So far 6 types are being emulated by fMSX. The following tables list the name of each game, and the cartridge type that is required to make the game work. Be sure to select the listed soundmode for optimal listening pleasure!

MSX1 megaROMs

Game	ROM type	Sound	Works?	Remarks
1942	SCC 1	-	Y	-
3-eyed One Comes Here	SCC 1	-	Y	-
Alien	Konami 1	-	Y	-
Animal	SCC 1	-	Y	-
Daiva	ASCII 1	-	Y	-
Dragon Quest	SCC 1	-	Y	-
Dragonslayer 4: Drasle Family	ASCII 1	-	Y	-
