1.2 What is it?

This is a Graphic User Interface for the Midifile Player GMPlay.

1.3 What does it do?

Supported options:

- Volume - Programmpriority - Mixingfrequency - Playbuffers - Polyphony
- Forcing XG-Mode - Forcing Mono-Mode - Tonefilter - Drumfilter - Midifile-Info
- GMPlay Output

For each Option exist a enable/disable button. If one option is disabled, it isn't used in the commandline, which is used to start the GMPlay. The default is used. Is it enabled, the option is allways used.

Example: If the Mono button is enabled, and the Mono button is pressed, the option "-mono" is set in the commando. If the Mono button isn't pressed, the option "-stereo" is used.

For more information about the options use the documentation, which is included in the GMPlay programmarchive!

Importand: The GMOut-Button must be pressed for informationoutput!

1.4 What is needed?

Requirements:

- Amiga - AOS2.0 or higher - Correct installed GMPlay - Midifiles (to listen)

1.5 Installation!

Installation:

Nothing special. Copy the program on the place wherever you want.

The settings are saved in the tooltypelist of the GMP-G-Icon.

1.6 Menu!

Menu:

Project/About Programmers info

Project/Load Midi Open a filerequetser for loading a Midifile

Project/Quit Quit the GMP-G. If a Midifile is playing, it stops! (Same function as the close button of the window)

Project/Quit&P Quit the GMP-G. If a Midifile is in use, the playing continuous!

Config/Load GMPlay Load the GMPlay programm.

Config/Save Save the configuration (Saved options: Buttons, the default directory and the window-possition)

Configs/Load Load the last safed configuration

1.7 Special!

Sepcials:

You can close the GMP-G with the menu "Project/Guit&P". The song, which is currently in use, continuous with playing. You can restart the GMP-G and stop the playing with the Stop button. This is only possible with songs which are startet from the GMP-G!

1.8 Problems

Problems:

1. The 14bit.driver of the GMPlay V1.3a makes problemes with the Iconpatches NoBorder and NoFill. Use GMPlay V1.3 2. If FastIPrefs is installed, CanDo makes problems with the Workbenchpatterns. Use the original Workbench IPrefs!
