E-Mail: michaela@flagranti.net

WWW: <http://www.flagranti.net/amiga/index.html>

She is the author the the excellent program VersCheck. This program allows you to check the versions of system files.

Thank you Michaela, for allowing me to include your program with the Classes Guide distribution.

For readers of this guide, VersCheck should make the version checking of system files a lot easier. It is a lot faster than any Arexx scripts I could have included with Classes Guide.

If you like the program please support Michaela and download the complete archive form the Aminet - util/cli/VersCheck.lha
This archive contains versions for the 68000 to the 68060.

VersCheck information

Michela, thank you very much for your program, keep up the good work, and kisses.

Classes Guide By Stuart Kelly Copyright 1999 ©

FREEMWARE

VersCheck is included by permission of
Michaela Prüß

Now you can check your classes using this excellent program. Just double click on the CheckClasses icon.

This guide hopes to become a list of all the custom BOOPSI classes that are available for the Amiga. Most of the classes are located in the SYS:classes/ drawer. This is added to the LIBS: assign in the startup-sequence.

Program specific classes are usually stored in the PROGDIR:classes/ or the PROGDIR:libs/ directory. MUI, for example, stores it's classes in the MUI:Libs/ directory.

Programs that have a lot of specific classes will get there own directory in Classes Guide. MUI:Libs/ is an example.

Classes provide a way of making BOOPSI classes portable, like libraries. This saves programmers having to re-write the same code over and over again.
