Chapter 1

MethodBBLib

1.1   Overview of MethodBBLib

```
                        Overview

            An OOP Library by Erwan Fouret

            For more infos, please consult
            Amiga International autodocs

            ©1997 by Erwan Fouret
```

1.2   MethodBBLib

```
Command: DoMethod
--------------------------------------------------------------------------------
Modes  :
Syntax : DoMethod(Obj,MethodID,Tag[,Tag..])

Execute the method 'MethodID' on the object 'Obj'.
```

1.3   MethodBBLib

```
Command: DoMethodA
--------------------------------------------------------------------------------
Modes  :
Syntax : DoMethodA(Obj,Msg)

Same as DoMethod but with a Tag structure as argument.
```

1.4   MethodBBLib

```
Command: DoSuperMethod
--------------------------------------------------------------------------
Modes  :
Syntax : DoSuperMethod(Class,Obj,MethodID,Tag[,Tag..])
```

Execute the method 'MethodID' on the object 'Obj' and from the superclass
'Class'.

1.5   MethodBBLib

```
Command: DoSuperMethodA
--------------------------------------------------------------------------
Modes  :
Syntax : DoSuperMethodA(Class,Obj,Msg)
```

Same as DoSuperMethod but with a Tag structure as argument.

1.6   MethodBBLib

```
Command: CoerceMethod
--------------------------------------------------------------------------
Modes  :
Syntax : CoerceMethod(Class,Obj,MethodID,Tag[,Tag..])
```

Execute the method 'MethodID' on the coerced object 'Obj' and from the class
'Class'.

1.7   MethodBBLib

```
Command: CoerceMethodA
--------------------------------------------------------------------------
Modes  :
Syntax : CoerceMethodA(Class,Obj,MethodID,Msg)
```

Same as CoerceMethod but with a Tag structure as argument.

1.8   MethodBBLib

```
Command: SetSuperAttrs
--------------------------------------------------------------------------------
Modes  :
Syntax : SetSuperAttrs(Class,Obj,Tag[,Tag..])

Change settings of the superclass 'Class' of the object 'Obj'.
```

1.9 MethodBBLib

```
Function: VarArgs
--------------------------------------------------------------------------------
Modes  :
Syntax : VarArgs(Tag[,Tag..])

Allow you to replace a tag structure.

Example :
---------

  Before :
  ~~~~~~~~

  NEWTYPE.tags a.l:b:c:d:e:f:g:h:i:j:k:l:m:n:o:p:q:r:s:t:u:v:w:x:y:z:End NEWTYPE

  DEFTYPE.tags tags

  tags\a=#A_TAG,var,0

  MyCommand_ *obj,tags

  After (now) :
  ~~~~~~~~~~~~~

  MyCommand_ *obj,VarArgs(#A_TAG,var,0)

  It's very easier and shorter!
```

1.10 MethodBBLib

```
               .---------------------------------------------------------------------
               |                           MethodBBLib                              |
               `--------------------------------------------------------------------'

                       Overview
```
