NCSA Telnet for the Macintosh
User's Guide

Version 2.6 · October 1994

National Center for Supercomputing Applications
University of Illinois at Urbana-Champaign

READ ME NOW

If you want to see more software like NCSA Telnet, please contact us by email or U.S. mail, telling us what you are doing with NCSA Telnet. We need to know: (1) What science you are working on—an abstract of your work would be fine; and (2) How NCSA Telnet has helped you, for example, by increasing your productivity or allowing you to do things you could not do before.

We encourage you to cite the use of NCSA Telnet, and any other NCSA software you have used, in your publications. A bibliography of your work would be extremely helpful.

Disclaimer

The University of Illinois gives no warranty, express or implied, for the software and/or documentation provided, including, without limitation, warranty of merchantibility and warranty of fitness for a particular purpose.

Acknowledgment

A great deal of thanks goes to Rick Watson of the University of Texas for help ing incorporate his authentication and encryption code into NCSA Telnet and for his permission to use parts of his documentation for this manual. See “Authentication and Encryption” on page 3–5.

Trademarks

NCSA Contacts
