

Sheet1

DRUGREORGANISM,C,73

- 1001 1 Herpes virus
- 1002 1 gram-negative: Pseudomonas, Proteus, Providencia, Acinitobacter
- 1002 1 Klebsiella, Enterobacter, Serratia, Escherichia coli. Staphylococcus.
- 1003 1 gram-negative: Escherichia coli, Proteus mirabilis, Neisseria gonorrhoea
- 1003 1 gram-positive: Streptococcus faecalis, non-penicillinase Staphylococcus.
- 1004 1 Candida, Cryptococcus, Blastomyces, Coccidioides, Histoplasma, Mucor
- 1004 1 Sporotrichum, Aspergillus, fungus.
- 1005 1 gram-positive: hemolytic and nonhemolytic Streptococcus,
- 1005 1 non-penicillinase Staphylococcus, Clostridium, Lysteria monocytogenes,
- 1005 1 and most strains of Enterococcus.
- 1005 1 gram-negative: Neisseria gonorrhoea, Proteus mirabilis, many strains
- 1005 1 of Salmonella, Shigella, and Escherichia coli.
- 1006 1 gram-negative, anaerobes: Pseudomonas, Klebsiella, Providencia,
- 1006 1 Proteus, Enterobacter, Serratia, Escherichia coli, Morganella,
- 1006 1 Clostridium, Eubacterium, Fusobacterium, Peptococcus, Peptostreptococcus.
- 1006 1 Enterococcus, Streptococcus, Staphylococcus.
- 1007 1 gram-negative, anaerobes: Pseudomonas, Klebsiella, Providencia,
- 1007 1 Proteus, Enterobacter, Serratia, Escherichia coli, Morganella,
- 1007 1 Clostridium, Eubacterium, Fusobacterium, Peptococcus, Peptostreptococcus.
- 1007 1 Enterococcus, Streptococcus, Staphylococcus.
- 1008 1 gram-negative, anaerobes: Pseudomonas, Klebsiella, Providencia,
- 1008 1 Proteus, Enterobacter, Serratia, Escherichia coli, Morganella,
- 1008 1 Clostridium, Eubacterium, Fusobacterium, Peptococcus, Peptostreptococcus.
- 1008 1 Enterococcus, Streptococcus, Staphylococcus.
- 1009 1 gram-negative, Proteus, Pseudomonas, Enterobacter, Escherichia coli,
- 1009 1 Bacteroides fragilis, Serratia marcescens, Providencia.
- 1010 1 gram-positive: Staphylococcus aureus, including penicillinase and
- 1010 1 non-penicillinase-producing strains, Staphylococcus epidermidis.
- 1010 1 beta-hemolytic Streptococcus and most Enterococcus.
- 1010 1 gram-negative: Escherichia coli, Klebsiella, Enterobacter,
- 1010 1 Proteus mirabilis, Proteus rettgeri, Proteus morganii, Proteus vulgaris.
- 1010 1 anaerobes: Bacteroides: most Bacteroides fragilis are resistant.
- 1011 1 Staphylococcus aureus, group A beta-hemolytic Streptococcus.
- 1011 1 gram-negative: Escherichia coli, Proteus mirabilis, Klebsiella,
- 1011 1 Enterobacter aerogenes, Proteus vulgaris.
- 1012 1 gram-positive aerobes: Staphylococcus aureus, Staphylococcus epidermidis,
- 1012 1 Streptococcus pyogenes, Streptococcus agalactiae, Enterococcus.
- 1012 1 gram-negative aerobes: Escherichia coli, Klebsiella, Enterobacter,
- 1012 1 Citrobacter, Proteus, Providencia, Morganella, Serratia, Pseudomonas,
- 1012 1 Neisseria gonorrhoea,
- 1012 1 gram-positive anaerobes: Peptococcus, Peptostreptococcus, Clostridium,
- 1012 1 Bacteroides fragilis and other Bacteroides species.
- 1013 1 gram-positive aerobes: Staphylococcus aureus including penicillinase
- 1013 1 producing strains, Staphylococcus epidermidis, Streptococcus pyogenes,
- 1013 1 Streptococcus agalactiae, Enterococcus.
- 1013 1 gram-negative aerobes: Citrobacter, Enterobacter, Escherichia coli,
- 1013 1 Klebsiella, Neisseria gonorrhoea, Proteus, Serratia, some Pseudomonas.
- 1013 1 anaerobes: Bacteroides, Clostridium, Peptococcus, Peptostreptococcus.

Sheet1

- 1014 1 gram-positive: Staphylococcus aureus, including penicillinase producing
1014 1 strains, Staphylococcus epidermidis, beta-hemolytic Streptococcus,
1014 1 most Enterococcus, Streptococcus faecalis is resistant.
1014 1 gram-negative: Escherichia coli, Klebsiella, Neisseria gonorrhoea,
1014 1 Proteus, Providencia, Morganella.
1014 1 anaerobes: Peptococcus, Peptostreptococcus, Clostridium, Bacteroides.
1015 1 gram-positive aerobes: Staphylococcus aureus, Staphylococcus epidermidis
1015 1 Streptococcus pyogenes.
1015 1 gram-negative aerobes: Klebsiella, Escherichia coli, Enterobacter,
1015 1 Proteus, Providencia, Morganella, Serratia, Pseudomonas aeruginosa,
1015 1 Neisseria gonorrhoea.
1015 1 anaerobes: Bacteroides, Peptococcus, Peptostreptococcus, Acinetobacter
1015 1 gram-negative aerobes: Providencia stuartii: anaerobes: Clostridium.
1016 1 beta-hemolytic Streptococcus, Staphylococcus including
1016 1 coagulase-negative and penicillinase producing strains, Escherichia coli,
1016 1 Proteus, Klebsiella.
1017 1 beta-hemolytic Streptococcus, Staphylococcus including
1017 1 coagulase-positive and penicillinase producing strains.
1017 1 Escherichia coli, Klebsiella, Proteus mirabilis.
1018 1 gram-positive aerobes: Staphylococcus aureus, Staphylococcus epidermidis
1018 1 Streptococcus. Streptococcus faecalis is resistant.
1018 1 gram-negative anaerobes: Bacteroides, Fusobacterium.
1018 1 gram-positive anaerobes: Propionibacterium, Eubacterium, Actinomyces.
1018 1 gram-negative anaerobes and microaerophilic gram-positive cocci including
1018 1 Peptococcus, Peptostreptococcus.
1019 1 gram-negative: Haemophilus ducreyi, Bacteroides, Escherichia coli,
1019 1 Klebsiella, Enterobacter aerogenes.
1019 1 gram-positive: Streptococci. Streptococcus faecalis is mostly resistant.
1019 1 Staphylococcus aureus. Chlamydia trachomatis.
1020 1 Chlamydia trachomatis, or as an alternative drug in Treponema pallidum
1020 1 Neisseria gonorrhoea, or Haemophilus ducreyi infections.
1020 1 alpha and beta-hemolytic Streptococcus, Staphylococcus.
1021 1 Candida, Cryptococcus, fungus.
1022 1 gram-negative: Escherichia coli, Proteus, Pseudomonas aeruginosa,
1022 1 Klebsiella, Enterobacter, Serratia. gram-positive: Staphylococcus.
1022 1 Streptococcus, Bacteroides, Clostridium are usually resistant.
1023 1 Tinea, Trichophyton, Microsporium, Epidermophyton, fungus.
1024 1 Staphylococcus aureus, Staphylococcus epidermidis, Neisseria gonorrhoea
1024 1 Escherichia coli, Enterobacter, Serratia, Acinetobacter, Proteus.
1025 2 All gram-positive and gram-negative organisms are sensitive to the
1025 2 effects of formaldehyde, the product of hydrolysis.
1026 1 Staphylococcus, penicillinase-susceptible and penicillinase-producing
1026 2 strains of Staphylococcus aureus.
1027 1 anaerobic gram-negative: Bacteroides, Fusobacterium.
1027 1 anaerobic gram-positive bacilli: Clostridium, Eubacterium.
1027 1 anaerobic gram-positive cocci: Peptococcus, Peptostreptococcus.
1027 2 Trichomonas, Gardnerella, Giardia, Amoeba.
1028 1 Coccidioides, Candida, Cryptococcus, fungus.
1029 1 gram-negative aerobes: Escherichia coli, Klebsiella, Proteus, Serratia

Sheet1

- 1029 1 Providencia, Morganella, Enterobacter, Pseudomonas.
- 1029 1 gram-positive aerobes: Staphylococcus, Streptococcus.
- 1029 1 anaerobes: Bacteroides, Fusobacterium, Clostridium, Eubacterium,
- 1029 1 Peptococcus, Peptostreptococcus, Neisseria gonorrhoea, Acinetobacter.
- 1030 1 penicillin G-sensitive and penicillin G-resistant Staphylococcus,
- 1030 1 beta-hemolytic Streptococcus, and alpha Streptococcus.
- 1031 1 gram-negative: Proteus, Klebsiella, Enterobacter, Escherichia coli.
- 1032 1 gram-negative: Citrobacter, Enterobacter, Escherichia coli, Proteus,
- 1032 1 Klebsiella, Pseudomonas.
- 1032 1 Staphylococcus (penicillin and methicillin resistant strains)
- 1033 1 Escherichia coli, Enterococcus, Staphylococcus aureus.
- 1034 2 Staphylococcus
- 1035 1 Staphylococcus (non-penicillinase), Neisseria gonorrhoea, Clostridium,
- 1035 1 Listeria monocytogenes, Treponema pallidum.
- 1035 1 gram-negative: only in high concentrations given intravenously.
- 1036 1 Staphylococcus (non-penicillinase), Neisseria gonorrhoea, Clostridia,
- 1036 1 Listeria monocytogenes, Treponema pallidum.
- 1036 1 gram-negative: only in high concentrations given intravenously.
- 1037 1 Neisseria gonorrhoea
- 1038 1 Escherichia coli, Klebsiella, Staphylococcus, Proteus, Chlamydia.
- 1038 1 Haemophilus ducreyi.
- 1039 1 Escherichia coli, Klebsiella, Staphylococcus, Proteus, Chlamydia.
- 1040 1 gram-negative: Escherichia coli, Enterobacter, Klebsiella.
- 1040 1 Streptococcus, Chlamydia, Haemophilus ducreyi, Staphylococcus.
- 1040 1 Neisseria gonorrhoea, Treponema pallidum, Listeria, Clostridium.
- 1041 1 gram-negative: Pseudomonas, Escherichia coli, Proteus, Enterobacter,
- 1041 1 Neisseria gonorrhoea.
- 1041 1 gram-positive: Staphylococcus, Streptococcus, Enterococcus.
- 1041 1 anaerobic: Bacteroides, Clostridium, Peptococcus, Peptostreptococcus.
- 1042 1 gram-negative: Pseudomonas, Proteus, Escherichia coli, Providencia,
- 1042 1 Klebsiella, Enterobacter, Serratia.
- 1042 1 gram-positive: Staphylococcus.
- 1043 1 Escherichia coli, Klebsiella, Enterobacter, Proteus.
- 1044 1 Streptococcus, Staphylococcus, Clostridium.
- 1039 1 Haemophilus ducreyi, Aerobacter.
- 1046 1 beta-hemolytic Streptococcus, Staphylococcus, including coagulase-
- 1046 1 positive, coagulase-negative, and penicillinase-producing strains.
- 1046 1 Escherichia coli, Proteus mirabilis, Klebsiella.
- 1045 1 Staphylococcus, including coagulase-positive, coagulase-negative, and
- 1045 1 penicillinase-producing strains, group A beta-hemolytic Streptococcus.
- 1045 1 gram-negative: Escherichia coli, Proteus mirabilis, Klebsiella.
- 1047 1 penicillinase and non-penicillinase producing Staphylococcus.
- 1047 1 group A beta-hemolytic Streptococcus.
- 1048 1 fungus, candida, Trichomonas vaginalis, Trichophyton.
