                  CompuServe Mail: 70242,104

Permission......: You have permission to distribute this program in any
                  way you wish, providing you stay within the ASP
                  guidelines.

Short descrptn..: Deletes unwanted Windows applications.

Long description: Windows applications scatter files and directories all
                  over your disk, and they may change your .INI files,
                  AUTOEXEC and CONFIG.SYS. Wipe-out automatically
                  deletes these files and directories and restores your
                  System Files to their status quo ante.

Updates.........: We track registrations by vendor so you will receive
                  updates automatically if your customers are registering
                  Wipe-out.
