Registration   MULTEDIT.INI File

 File Menu

New   Opens a new window.
Open   Brings up a dialog box to open a new text file.
Close   Closes the currently selected window.
Save   Saves the current text file.
Save As   Saves the current text file under a new name.
Print   Prints the current text file.
Recent File List   Lists the 9 most recent files used for easier retrieval.
Exit   Exits MultiEdit.

Edit Menu

Undo	Undoes the previous change to the active text file.
Cut	Cuts the selected text into the clipboard.
Copy	Copies the selected text into the clipboard.
Paste	Pastes the text on the clipboard into the selected area.
Delete	Deletes the selected text.
Find	Finds an occurrence text within the currently selected item.
Find Next	Finds the next occurrence of text within the currently selected item.
Replace	Replaces all occurrences of one string with another in the currently selected item.
Options	Brings up the <u>Options Screen</u>.
Font	Changes the font for all windows and printing. This information is saved in the <u>CODEKEEP.INI</u> file.
Select All	Selects all text in the current text file.
Time/Date	Inserts the current time and date into the active text file.
Upper Case	Converts the selected text to all upper case letters.
Lower Case	Converts the selected text to all lower case letters.
Left	Shifts the selected text to the left by removing one leading space from each line.
Right	Shifts the selected text to the right by adding one leading space to each line.

 Window Menu

Cascade	Cascades the open windows.
Tile Horizontal	Tiles the open windows horizontally.
Tile Vertical	Tiles the open windows vertically.
Arrange Icons	Arranges the iconized windows.
Close All	Closes all open text windows prompting for save if needed.
Window List	Keeps a list of the current windows to select from.

Help Menu

Contents   Brings up the help file.
About   Brings up the about screen.
Register   Brings up the <u>Registration</u> window.   (not visible in registered version)

Text Window

This window displays the current text file for viewing and editing.   Text in this window can be edited and then saved with the command from the File menu if it was not loaded read-only.

When the right mouse button is clicked on the text area, a menu of editing commands pops up based on the selection.   See Edit Menu.

A new window can be created by selecting New from the File menu.

Initialization File: MULTEDIT.INI

When you change any options on the options screen, they are saved to the MULTEDIT.INI in your MultiEdit directory.

The MULTEDIT.INI flag is an ASCII text file, which should not be edited since values read from this file are not validated.   If an item is deleted from the file, MultEdit will replace it with a default value.

The following information is saved to the MULTEDIT.INI file:

MultiEdit:

> Maximized Child: Tells if the startup code window is maximized.
> ToolBar: Tells MultiEdit whether to display the tool bar or not.
> Dialog Filter: Tells MultiEdit what selections to put in the file dialog boxes.   Do not change this unless you know what you are doing.   If you mess it up, delete the line and MultiEdit will replace it with a default.

Font:

> Details about the default font used for all MultiEdit windows and printing.

Window:

> Position of the MultiEdit windows at startup.   This is saved every time you exit.

Registration:

> Encrypted information that tells the program if you are registered.   Do not change these entries as it will render your program unregistered.   Use the Registration screen to enter this data.   If you want to re-enter your registration information, delete this section.

Old Files:

> This is where MultiEdit keeps a list of recently used files.   Every time a file is opened or saved, it is put at position 1.

Registration

MultiEdit for Windows is distributed as "shareware."   It is not free software.   You are being given a chance to use this program for a period of thirty (30) days before buying it.   If after this time you continue to use MultiEdit, you are expected to register it.   Registration gives you the right to continue to use this software as well as news and discounts on future upgrades.   You are encouraged to distribute this software, providing it is distributed in its entirety and without charge (except for media and handling, if applicable).   I reserve the right to change these restrictions in future versions.

If you find this product useful and continue to use MultiEdit after thirty days, you are required to register it by making a payment of $10 (US) to me.   Include an additional $3 (US) if you would like the most recent version mailed to you.   This fee will license one copy of MultiEdit for use on any one computer at any one time.   To register MultiEdit, print out the form called   REGISTER.WRI using Windows Write and send with your payment to:

> Bradley S. Murray
> 20 Lorrie Lane
> PO Box 365
> Princeton Jct., NJ 08550

You may also contact me by E-Mail at bmurray@pluto.njcc.com.   I would like to hear suggestions for updates as well as overall comments.

 Options Screen

Allows you to change options for the program.

Max Child Window Tells the program to maximize the active text window at the start of the program.

Tool Bar Makes the tool bar visible.   This tool bar gives you easier access to many of the menu commands.

Text Window
This window displays the current text file.   Text in this window can be edited and then saved
with the command from the File menu.

When the right mouse button is clicked on the text area, a menu of editing commands pops
up based on the selection.

A new window can be created by selecting New from the File menu.

Shift Left/Right

Left   Shifts the selected text to the left by removing one leading space from each line.

Right   Shifts the selected text to the right by adding one leading space to each line.

Upper/Lower Case
Upper Case Converts the selected text to all upper case letters.
Lower Case Converts the selected text to all lower case letters.

New
Opens a new window.

Open
Brings up a dialog box to open a new text file.

Save
Saves the current text file.

Cut
Cuts the selected text into the clipboard.

Copy
Copies the selected text into the clipboard.

Paste
Pastes the text on the clipboard into the selected area.

Font
Changes the font for all windows and printing.   This information is saved in the
CODEKEEP.INI file.

Print
Prints the current text file.

Help
Brings up the help file.

File Location
Tells you where you are in the text file as [position in file] of [length of file]
