Definition of Shareware

Shareware distribution gives users a chance to try software before buying it. If you try a Shareware program and continue using it, you are required to register it (or purchase the licensed version as in the case of ImageCommander).

Copyright laws apply to both Shareware and retail software, and the copyright holder retains all rights, with a few specific exceptions as stated below. Shareware authors are accomplished programmers, just like retail authors, and the programs are of comparable quality. (In both cases, there are good programs and bad ones!) The main difference is in the method of distribution. The author specifically grants the right to copy and distribute the software, either to all and sundry or to a specific group. For example, some authors require written permission before a commercial disk vendor may copy their Shareware.

Shareware is a distribution method, not a type of software. You should find software that suits your needs and pocketbook, whether it's retail or Shareware. The Shareware system makes fitting your needs easier, because you can try before you buy. And because the overhead is lower, prices are lower also. Shareware has the ultimate money-back guarantee -- if you don't use the product, you don't pay for it.

ASP Ombudsman Policy

This program is produced by a member of the Association of Shareware Professionals (ASP). ASP wants to make sure that the shareware principle works for you. If you are unable to resolve a shareware-related problem with an ASP member by contacting the member directly, ASP may be able to help. The ASP Ombudsman can help you resolve a dispute or problem with an ASP member, but does not provide technical support for members' products. Please write to the ASP Ombudsman at 545 Grover Road, Muskegon, MI 49442-9427 or send a CompuServe message via CompuServe Mail to ASP Ombudsman 70007,3536

COMMUNICATIONS BETWEEN THE PARTIES RELATING TO THE SUBJECT MATTER OF
THE
LIMITED WARRANTY.

Installing ImageCommander

Before you can use ImageCommander you have to run the ImageCommander setup program from Windows so it will work properly on your computer. You cannot just copy the files from the ImageCommander disk to your hard disk. The files on the distribution disk are packed in a special way to save space. The setup program unpacks those files and builds them on your working disk.

1. Make Windows' "Program Manager" the active window.
2. From Windows' "Program Manager", select "File", then select "Run". This will open the "Run" dialog box.

Place a the ImageCommander disk in your floppy drive. Type in the dialog box the command that will run the ImageCommander setup program.

If your floppy disk goes in your Drive "A", type:

A:SETUP

If your floppy disk goes in your Drive "B", type:

B:SETUP

Leave the "Run Minimized" box un-selected, and click the "OK" command button (or press "Enter").

3. After a brief moment you will be prompted by a dialog box to enter the desired location for ImageCommander. This is the location that you want your ImageCommander files to be placed. It will suggest a drive and directory of "C:\PSP".

If you want the ImageCommander program files installed on a different drive or directory, just click the pointer to the right of the characters you want to change, backspace over the ones you want to erase, then type in the new designation.

4. ImageCommander Setup will unpack the necessary files and place them into your directory. The status of the operation will be displayed as the setup program does this work. If ImageCommander came on more than one disk, during the unpacking of the disks you will be requested to insert the next disk.
5. You will be asked if you would like to add ImageCommander to the program manager.

Select "No" if you do not want ImageCommander added to your program manager.

Select "Yes" to have the setup program automatically build a ImageCommander icon and add it to your program manager.

6. The setup program will notify you when the installation is complete.

The User's Manual

In order to keep the size of the Shareware version of ImageCommander reasonable no user's manual is provided. You will find that ALL menu items and associated dialog boxes, along with general information, is provided on line using the HELP-INDEX menu option of the program.

When you purchase the licensed version of ImageCommander you will receive the fully illustrated, perfect bound User's Guide.

Distributing

You are encouraged to pass a copy of the shareware version of ImageCommander along to your friends for evaluation.

If you do so, you must provide them with the entire set of ImageCommander shareware version files. These include:

SETUP.EXE
SETUP.INF
IC1.CMP
README.TXT
VENDOR.DOC
FILE_ID.DIZ

Do not simply copy the files off your hard drive. ImageCommander must be installed using the SETUP program!

If you intend to charge for distribution, you must adhere to the requirements of the vendor.doc file.

Purchasing the Licensed Version

You may use the shareware version of ImageCommander for a 30 day trial period. If you would like to continue to use ImageCommander after the 30 day trial period, you are required to purchase the licensed version of ImageCommander.

When you purchase the licensed version of ImageCommander you will receive a disk with the licensed version and the printed user's guide.

ImageCommander may be purchased from a number of sources. You are free to purchase your copy from where ever you desire.

To obtain the listing of vendors, and print an order form:

1. Start ImageCommander.
2. At the Shareware Dialog Box press the "Help" button.
3. Click the left mouse button on the vendor of your choice.
4. Select File-Print Topic from the Help System to print the order form.
