

SpellChk 1.0
September 14, 1992

This is the first release of SpellChk. This first version does not include the ability to have SpellChk monitor the actual input of text while it is being entered. This enhancement is currently being worked on and should be available within a short period of time. At that time, the registration fee for SpellChk will be raised from \$22.50 to \$30.00. Users who register SpellChk Version 1 will be automatically registered to use Version 2 without an upgrade fee. Registered users of WinAto may register SpellChk for \$15.00.

A registration form is included at the end of SPELLCHK.WRI and in ORDER.TXT.

Please report any difficulties you may encounter as soon as possible. Comments and suggestions are welcome.

Thank you for trying SpellChk. If you continue to use the program past the 21 day trial period, please register the program so that I may continue to provide quality shareware at a very reasonable price.
