Destroyer for Windows Version 2.0

The popularity of DES4WIN (ver 1.0) has allowed us to improve the game
to new entertaining heights. We've added a new screen, high score storage,
awards of military rank, a smarter computer opponent, sinking ships, online
help and more gaming options.

Registering this game will also give you 1.5 MEG worth of sound effects for
your sound board. With screaming bombs, horrific explosions, the last gasps
of a sinking ship, and the occasional "She's taking on water, Captain",
the audio version of this game completes the specter of this old, naval war
favorite. You will also receive a Windows(tm) setup application which
will personalize your registered version.

All registered users enjoy free updates when they are made available.
Timberline Software is currently developing version 3.0 which will include
a Spanish Armada view and modem/network support for remote opponents.

The registration fee is $20
Send check to:

> CIS: 71162, 2761

Feel free to suggest new improvements to the game and also let us know
how you discovered it. Thank you for your support in shareware!
