- Press the  button.
- From the View menu, choose Desktop.
- Press (Alt V, D)

To view only the puzzle game titles:

- Press the  button.
- From the View menu, choose Puzzle.
- Press (Alt V, P)

To view other game titles:

- Press the  button.
- From the View menu, choose Other.
- Press (Alt V, O)

Escape without making changes:

- Press the  button.

Shareware or Shareware?

WHAT IS SHAREWARE:

Shareware is not a particular type of software, rather a marketing channel for developers of software. Shareware is **copyrighted** software distributed at a minimal cost enabling the end user to try before you buy based on a user honor system. Basically, you save money by not buying software that doesn't meet your requirements. After evaluating this software, if you find any shareware games useful, then you are **required** to pay and register the game directly with the developer according to their terms.

WHAT IS PUBLIC DOMAIN/FREWARE:

Public domain is software when the author has given up all intellectual property rights and his/her right to control the use of the product. You do not have to pay a registration fee to use this software.

To turn the sound off:

- From the Options menu, choose Sound.
- Press (Alt O, S)
