

Sheet1

was originally developed. We have added some screen enhancements and made some modifications based on user comments and suggestions. Here are some of the changes you can expect:

QUIZZER now supports color displays. The first time QUIZZER is started you may now select Color or Monochrome display. If you ever need to change the display type, you may simply delete the file QZR.MEM and restart QUIZZER. This will allow you to reset the display type.

There is a new menu style throughout the game. You may now use the arrow keys, the page up and down keys, the home and end keys or the first letter of any menu selection to move through and select the desired action or category displayed.

Our OnLine Users Guide has been expanded, and the onScreen viewing module has been improved to help users find information quickly.

With version 3.0 you may now load additional questions to your game's master file without exiting the QUIZZER software. You now have a menu selection that facilitates adding additional questions from distributed QUIZZER Question Disks.

We have corrected the misspellings throughout the software and question files and have intensified our editing procedures so as to avoid misspellings. Our apologies for those found in earlier versions.

We have altered the way QUIZZER handles answers submitted to text entry questions. In the past we insisted on exact answers. QUIZZER has been modified to review and evaluate your text entry answers more liberally. For example, when we ask for lastname only, if you do put in the first name, and get the last name correct, this will now be considered acceptable.

Version 1.0 and 2.0 users may use their existing question files with version 3.0, however they must first convert their older version files. We have included a batch file called CONVERT.BAT that will accomplish the conversion for you. Simply type the word CONVERT to alter your older files so as to be compatible with version 3.0. Note! Once converted, your files can no longer be used with earlier versions so please be sure they are backed up before you convert them.

Version 3.0 no longer requires the files called QZRCATS.DBF or QZRCATS.NTX. These are removed if the CONVERT batch file is used. These are still required for versions earlier than 3.0 so delete them only if you intend to use version 3.0 exclusively.

Sheet1

Be sure to fill out the form completely whether you are registering or ordering (or both). We keep this information on file so that we know what disk format you prefer, what your computer is like, and so on.

3 QUIZZER Registration / Order Form 3

What do you want to do? (Check all that apply)

- I want to register myself as a QUIZZER Enthusiast.
- I have enclosed a check or money order for \$15.00
- I would also like to order additional QUIZZER Question Disks at this time.
- I am already a registered QUIZZER Enthusiast and am ordering additional QUIZZER Question Disks.

Your name and address please...

Name _____

Address _____

City _____ State _____ Zip Code _____

Please tell us about the computer on which QUIZZER is run. (Check all that apply)

Computer type: PC XT AT PS/2 OTHER

Make and Model: _____
