

- *---A MACRO MANAGER to activate any macro without first combining it to the worksheet. The macro manager combines the macro, defines the range names and activates the macro. When the macro is done the MACRO MANAGER deletes the range names and erases the macro.
- *---Use the /Range Name Label Right {End} {Down} <ENTER> to define the range names in this column (starts with the \Y name)
- *---Place the cell pointer at upper left cell of the range to be processed
- *---Hold the <ALT> key and press <Y> to activate the macro

THIS MANAGER WORKS WITH LOTUS 2/2.01/2.2/2.3/2.4
