

*---A MACRO MANAGER to activate any *.MLB library macro in the default directory

*---Use the /Range Name Label Right {End} {Down} <ENTER> to define the range names in this column (starts with the \Y name)

*---Place the cell pointer at upper left cell of the range to be processed

*---Hold the <ALT> key and press <Y> to activate the macro

* * * See the README.PRN file for details * * *

* * * FOR VERSION 2.2/2.3/2.4 * * *
