Chapter 1

Convert35Icon

1.1 Ermmm... Is anyone reading this?

Do You like OS3.5 icons? You do not own OS3.5 package? Is it hopeless?

The answer is simple: NO ;)

This small utility does convert OS3.5 PaletteMapped icons into NewIcons.

Whole hard job is made by Convert35Icon. All You have to do is specify some arguments. Not too hard isn't it? ;)

[Installation](#)

[Requirements](#)

[Features](#)

[Usage](#)

[BUGS](#)

[History](#)

[Credits](#)

[Author](#)

1.2 How to install?

Installation:

Just copy the specified executable ('Convert35Icon'/'[Convert35Icon_OS31](#) ') wherever You want...

Or use supplied installer script...

1.3 Is 603e/333 needed?

Requirements:

-OS3.5 to make it fully functional

-OS3.1 to run ' [special](#) ' version of Convert35Icon... Read about it [here](#)

-newicon.library V40+

-asl.library V38+

1.4 Does it play Chess?

Features:

- long names support (up to 103 characters)
- small size
- simply usage
- may strip PaletteMapped icon
- may strip Planar icon (ONLY OS3.5 version!)

1.5 Say HELLO

Usage:

From CLI:

Source/A:

source icon (PaletteMapped)

Dest/A:

destination icon (NewIcon)

KEEPPALETTEMAPPED=KPM/S:

Convert35Icon won't try to remove PaletteMapped icon image from destination

KEEPSTANDARD=KP/S:

Convert35Icon won't try to remove Plain icon image from destination

Note:

1. You may specify source/dest with or without '.info' extension.
2. KEEPSTANDARD works only in OS3.5 version (not the **patched one**)

From Workbench:

Just doubleclick Convert35Icon and a asfilerequester will popup.

Then select icon to convert...

WARNING: When using from WB selected icon will be overwritten!!!

1.6 I need a blueberry

BUGS:

None found (Yet;)

1.7 ColorMapped on OS3.1? Naaa ;)

Convert35Icon and OS3.1 Notes:

So You want to convert OS3.5 icons to NewIcons and You do NOT have OS3.5 installed?

Yes? So read on...

You may do it by **hand** :

Or using installation script...

The choice is Yours ;)

NOTE: It MAY work on OS3.0 (NOT tested though)

1.8 Let's rock

First You need to get icon.library V44+

(OS3.5 relase, OS3.5 BoingBag1 relase, OS3.5 DOpus relase supported)

Second apply the patch to Convert35Icon by typing this into console:

```
'gpatch Convert35Icon patches.ptg Convert35Icon_OS31'
```

Then copy the new executable as Convert35Icon anywhere You want...

Now the last stage

```
'gpatch icon.library patches.ptg LIBS:ic35.library'
```

(This is icon.library V44+, remember?)

Done!

Now You may convert any OS3.5 icon to NewIcon without installed OS3.5...

1.9 When I was six i started to...

History:

44.0

I've started, I've written, I've relased ;)

44.1

Added workbench support

44.2

Some cleanups

1.10 So... You need help HELP

lol :)

No help yet;)

1.11 Who used to be helpfull

Credits:

gpatch is © Ralf Gruner

newicon.library is © Eric Sauvageau

OS3.5 is © Amiga Inc.

This proggy is FREEWARE.
